Volume 7880

Proceedings of SPIE, 0277-786X, v. 7880

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publishers are not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

The CCC fee code is 0277-786X/11/\$18.00.

Printed in the United States of America.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

KEYNOTE PRESENTATION

7880 02	Signal rich art: enabling the vision of ubiquitous computing (Keynote Paper) [7880-01] B. Davis, Digimarc Corp. (United States)
---------	---

SECURITY

7880 04	Comparison of three solutions to correct erroneous blocks to extract an image of a multiplicative homomorphic cryptosystem [7880-02] N. Islam, W. Puech, LIRMM Lab., CNRS, Univ. Montpellier II (France); R. Brouzet, I3M Lab., CNRS, Univ. Montpellier II (France)
7880 05	Homomorphic encryption-based secure SIFT for privacy-preserving feature extraction [7880-03] C.-Y. Hsu, Institute of Information Science (Taiwan) and National Taiwan Univ. (Taiwan); C.-S. Lu, Institute of Information Science (Taiwan); S.-C. Pei, National Taiwan Univ. (Taiwan)

FORENSICS I

7880 06	Determining approximate age of digital images using sensor defects [7880-04] J. Fridrich, M. Goljan, Binghamton Univ. (United States)
7880 07	Performance comparison of denoising filters for source camera identification [7880-05] A. Cortiana, V. Conotter, G. Boato, F. G. B. De Natale, Univ. degli Studi di Trento (Italy)
7880 08	Identifying image forgeries using change points detection [7880-06] B. Mahdian, S. Saic, Institute of Information Theory and Automation (Czech Republic)
7880 09	Enhancing ROC performance of trustworthy camera source identification [7880-07] X. Kang, Y. Li, Z. Qu, J. Huang, Sun Yat-Sen Univ. (China)

WATERMARK I

7880 0A	Feature point-based 3D mesh watermarking that withstands the cropping attack [7880-08] M. Montañola Sales, I. Darazi, J. Giard, Univ. Catholique de Louvain (Belgium); P. Rondao Alface, Alcatel-Lucent Bell Labs. (Belgium); B. Macq, Univ. Catholique de Louvain (Belgium)
---------	--

- 7880 0B **A perceptually driven hybrid additive-multiplicative watermarking technique in the wavelet domain** [7880-09]
F. Autrusseau, S. David, V. Pankajakshan, IRCCyN-IVC, CNRS, Univ. de Nantes (France);
P. Campisi, Univ. degli Studi di Roma Tre (Italy)
- 7880 0C **Assessment of camera phone distortion and implications for watermarking** [7880-10]
A. Gurijala, A. Reed, E. Evans, Digimarc Corp. (United States)
- 7880 0D **A new metric for measuring the visual quality of video watermarks** [7880-11]
D. Trick, S. Thiemert, Fraunhofer-Institut für Sichere Informations-Technologie (Germany)

STEGANOGRAPHY

- 7880 0E **A curiosity regarding steganographic capacity of pathologically nonstationary sources** [7880-12]
A. D. Ker, Univ. of Oxford (United Kingdom)
- 7880 0F **Design of adaptive steganographic schemes for digital images** [7880-13]
T. Filler, J. Fridrich, Binghamton Univ. (United States)
- 7880 0G **Feature restoration and distortion metrics** [7880-14]
V. K. Chonev, A. D. Ker, Univ. of Oxford (United Kingdom)

WATERMARK II

- 7880 0H **Lossless image data embedding in plain areas** [7880-16]
M. Fallahpour, D. Megias, Univ. Oberta de Catalunya (Spain); Y. Q. Shi, New Jersey Institute
of Technology (United States)
- 7880 0I **Re-synchronizing audio watermarking after nonlinear time stretching** [7880-17]
M. Steinebach, S. Zmudzinski, Fraunhofer-Institut für Sichere Informations-Technologie
(Germany); S. Nürnberger, Technische Univ. Darmstadt (Germany)

STEGANALYSIS I

- 7880 0J **On locating steganographic payload using residuals** [7880-19]
T.-T. Quach, Univ. of New Mexico (United States)
- 7880 0K **Steganalysis using logistic regression** [7880-20]
I. Lubenko, A. D. Ker, Univ. of Oxford (United Kingdom)
- 7880 0L **Steganalysis in high dimensions: fusing classifiers built on random subspaces** [7880-21]
J. Kodovský, J. Fridrich, Binghamton Univ. (United States)

CONTENT IDENTIFICATION I

- 7880 OM **Private content identification based on soft fingerprinting** [7880-22]
S. Voloshynovskiy, T. Holotyak, O. Koval, F. Beekhof, F. Farhadzadeh, Univ. of Geneva (Switzerland)
- 7880 ON **Geometrically robust perceptual fingerprinting: an asymmetric case** [7880-23]
O. Koval, S. Voloshynovskiy, F. Farhadzadeh, T. Holotyak, F. Beekhof, Univ. of Geneva (Switzerland)
- 7880 OO **Trading-off performance and complexity in identification problem** [7880-24]
T. Holotyak, S. Voloshynovskiy, O. Koval, F. Beekhof, Univ. of Geneva (Switzerland)

FORENSICS II

- 7880 OP **A context model for microphone forensics and its application in evaluations** [7880-25]
C. Kraetzer, K. Qian, M. Schott, J. Dittmann, Otto-von-Guericke-Univ. Magdeburg (Germany)
- 7880 OQ **Double H.264/AVC compression detection using quantized nonzero AC coefficients** [7880-26]
D. Liao, R. Yang, H. Liu, J. Li, J. Huang, Sun Yat-Sen Univ. (China)
- 7880 OR **Forensic printer detection using intrinsic signatures** [7880-27]
A. K. Mikkilineni, N. Khanna, E. J. Delp, Purdue Univ. (United States)

STEGANALYSIS II

- 7880 OS **Non-destructive forensic latent fingerprint acquisition with chromatic white light sensors** [7880-28]
M. Leich, S. Kiltz, J. Dittmann, Otto-von-Guericke-Univ. Magdeburg (Germany); C. Vielhauer, Fachhochschule Brandenburg (Germany)
- 7880 OT **Detecting messages of unknown length** [7880-29]
T. Pevný, Czech Technical Univ. in Prague (Czech Republic)
- 7880 OU **A new paradigm for steganalysis via clustering** [7880-30]
A. D. Ker, Oxford Univ. (United Kingdom); T. Pevný, Czech Technical Univ. in Prague (Czech Republic)

CONTENT IDENTIFICATION II

- 7880 OV **Collusion-secure patchwork embedding for transaction watermarking** [7880-31]
W. Berchtold, S. Zmudzinski, M. Schäfer, M. Steinebach, Fraunhofer-Institut für Sichere Informations-Technologie (Germany)

- 7880 OW **Probabilistic fingerprinting codes used to detect traitor zero-bit watermark** [7880-32]
M. Desoubeaux, Orange Labs. (France) and LIRMM Lab., CNRS, Univ. Montpellier II (France);
G. Le Guelvouit, Orange Labs. (France); W. Puech, LIRMM Lab., CNRS, Univ. Montpellier II
(France)
- 7880 OX **Rihamark: perceptual image hash benchmarking** [7880-33]
C. Zauner, Upper Austria Univ. of Applied Sciences (Austria); M. Steinebach, Fraunhofer
Institute for Secure Information Technology (Germany); E. Hermann, Upper Austria Univ. of
Applied Sciences (Austria)

MISCELLANEOUS

- 7880 OZ **Contrast-enhancing and deterministic tone mapping method in natural image hiding
scheme using halftone images** [7880-35]
E. Myodo, K. Takagi, R. Kawada, KDDI R&D Labs., Inc. (Japan)
- 7880 10 **Toward the identification of DSLR lenses by chromatic aberration** [7880-36]
J. Yu, S. Craver, E. Li, Binghamton Univ. (United States)

Husrev Taha Sencar, TOBB Ekonomi ve Teknoloji Üniversitesi (Turkey)
Gaurav Sharma, University of Rochester (United States)
Claus Vielhauer, Otto-von-Guericke-Universität Magdeburg
(Germany)
Svyatoslav V. Voloshynovskiy, University of Geneva (Switzerland)
Min Wu, University of Maryland, College Park (United States)
Chang D. Yoo, Korea Advanced Institute of Science and Technology
(Korea, Republic of)

Session Chairs

- Keynote Presentation
Adnan M. Alattar, Digimarc Corporation (United States)
- 1 Security
Scott A. Craver, Binghamton University (United States)
- 2 Forensics I
Gaurav Sharma, University of Rochester (United States)
- 3 Watermark I
Adnan M. Alattar, Digimarc Corporation (United States)
- 4 Steganography
Jessica Fridrich, Binghamton University (United States)
- 5 Watermark II
Tomáš Filler, Binghamton University (United States)
- 6 Steganalysis I
Andrew D. Ker, University of Oxford (United Kingdom)
- 7 Content Identification I
Regunathan Radhakrishnan, Dolby Laboratories, Inc. (United States)
- 8 Forensics II
Hany Farid, Dartmouth College (United States)
- 9 Steganalysis II
Chad D. Heitzenrater, Air Force Research Laboratory (United States)
- 10 Content Identification II
Oleksiy Koval, University of Geneva (Switzerland)

Introduction

It is our pleasure to bring to you the papers presented at the Media Watermarking, Security, and Forensics XIII Conference. This year, after discussion and feedback from the program committee, we added the term "Watermarking" to the conference name in order to acknowledge the sponsorship of the Digital Watermarking Alliance. We think the new name better reflects the scope of the conference.

As usual, we had a good number of quality submissions and unfortunately, could not accommodate all the papers in the conference. The goal of the conference, as always, was to provide a forum for the discussion of issues in multimedia security. We had papers that addressed protecting and watermarking audio, image, and video content, along with many interesting papers on forensics and Steganalysis techniques for these types of media.

The highlight of this year's conference were the two keynote talks that were very well attended and very well received by one and all. The talks were:

1. **Signal rich art: enabling the vision of ubiquitous computing** by Bruce Davis, the CEO of Digimarc Corp. [788002]
2. **Image and video manipulation: past, present, and future** by Dan Goldman, Adobe Systems Inc. [no manuscript]

In addition to the above keynotes we also had a special presentation of the IS&T/SPIE 2010 best paper award sponsored by the Digital Watermarking Alliance (DWA), that was awarded to the paper entitled "**Minimizing embedding impact in steganography using trellis-coded quantization**" [754105], by Tomáš Filler, Jan Judas, Jessica Fridrich from Binghamton University in New York. The award was \$1,500 divided equally among all authors.

The IS&T/SPIE 2011 Best Paper Award will continue to be sponsored by the Digital Watermarking Alliance and nominations for the award were solicited during the conference. The chair of each session of the conference nominated outstanding papers from their session(s) for this award, which will be reviewed by the Best Paper Selection Committee. The winning paper will be publicized in the Media Watermarking, Security, and Forensics XIV Conference. The following papers were nominated, all of which you will find in these proceedings:

1. "Steganalysis in high dimensions: fusing classifiers built on random subspaces" by Jan Kodovský and Jessica Fridrich from Binghamton University (United States) [78800L]

2. "Re-synchronizing audio watermarking after non-linear time stretching" by Martin Steinebach and Sascha Zmudzinski from Fraunhofer-Institut für Sichere Informations-Technologie (Germany) [78800I]
3. "A new paradigm for steganalysis via clustering" by Andrew Ker from University of Oxford (United Kingdom) and Tomas Pevný from Czech Technical University in Prague (Czech Republic) [78800U]
4. "Design of adaptive steganographic schemes for digital images" by Tomáš Filler and Jessica Fridrich from Binghamton University (United States). [78800F]

Congratulations to the above authors for their outstanding contributions and we eagerly await the award committee's final decision.

As we say every year, we have come a long way in protecting our "digital future," but we still have a lot of work to do. We would like to thank the Program Committee for their help in reviewing the papers and their advice on the final program.

We look forward to seeing you in 2012 in San Francisco!

**Nasir D. Memon
Jana Dittmann
Adnan Alattar
Edward J. Delp III**
