The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

**Paper Numbering:** Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.
## SESSION 1 INVITED SESSION ON OPTICAL PATTERN RECOGNITION

<table>
<thead>
<tr>

SESSION 4  CORRELATION FILTERS FOR OPTICAL PATTERN RECOGNITION

8398 0D  Improving OT-MACH filter performance for target recognition applications with the use of a Rayleigh distribution filter [8398-13]
A. Alkandri, N. Bangalore, A. Gardezi, P. Birch, R. Young, C. Chatwin, Univ. of Sussex (United Kingdom)

8398 0E  Composite wavelet filters for enhanced automated target recognition [8398-14]
J. N. Chiang, Univ. of California, Los Angeles (United States); Y. Zhang, Onescreen Inc. (United States); T. T. Lu, T.-H. Chao, Jet Propulsion Lab. (United States)

8398 0G  Variants of minimum correlation energy filters: comparative study [8398-16]
N. N. Evtikhiev, D. V. Shaulskiy, E. Yu. Ziokazov, R. S. Starikov, National Research Nuclear Univ. MEPhI (Russian Federation)

SESSION 5  TECHNIQUES AND APPLICATIONS

8398 0H  Compact liquid crystal waveguide Fourier transform spectrometer for real-time gas sensing in NIR spectral band [8398-17]

8398 0I  A secure approach for encrypting and compressing biometric information employing orthogonal code and steganography [8398-18]
M. F. Islam, George Washington Univ. (United States); M. N. Islam, Farmingdale State College, SUNY (United States)

8398 0J  Spatial domain sharpening of color image employing bidimensional empirical mode decomposition [8398-19]
S. M. A. Bhuian, Univ. of South Alabama (United States); J. F. Khan, Tuskegee Univ. (United States); M. S. Alam, Univ. of South Alabama (United States)

8398 0K  Automated detection of semagram-laden images using adaptive neural networks [8398-20]
P. S. Cerkez, Nova Southeastern Univ. (United States) and DCS Corp. (United States); J. D. Cannady, Nova Southeastern Univ. (United States)
POSTER SESSION

8398 0M  A new time-adaptive discrete bionic wavelet transform for enhancing speech from adverse noise environment [8398-22]
S. Palaniswamy, Bannari Amman Institute of Technology (India); P. Duraisamy, Univ. of North Texas (United States); M. S. Alam, Univ. of South Alabama (United States); X. Yuan, Univ. of North Texas (United States)

8398 0N  Design and simulation of a multiport neural network heteroassociative memory for optical pattern recognitions [8398-23]
V. Krasilenko, Vinnitsa Social Economy Institute (Ukraine); A. Lazarev, Vinnitsa National Technical Univ. (Ukraine); S. Grabovlyak, Vinnitsa Social Economy Institute (Ukraine)

8398 0O  The investigation of the Fourier spectrum-based image complexity metrics for recognition applications [8398-24]
V. Perju, National Council for Accreditation and Attestation (Moldova); D. Casasent, Carnegie Mellon Univ. (United States)

8398 0P  Hybrid optical-digital encryption system based on wavefront coding paradigm [8398-25]
M. V. Konnik, The Univ. of Newcastle (Australia)

8398 0Q  Development of a novel image processing method: the LPED method [8398-26]
C. J. Hu, Southern Illinois Univ. Carbondale (United States) and SunnyFuture (United States)

8398 0R  Using wavefront coding technique as an optical encryption system: reliability analysis and vulnerabilities assessment [8398-27]
M. V. Konnik, The Univ. of Newcastle (Australia)

Author Index
Conference Committee

Symposium Chair

Kevin P. Meiners, Office of the Secretary of Defense (United States)

Symposium Cochair

Kenneth R. Israel, Lockheed Martin Corporation (United States)

Conference Chairs

David P. Casasent, Carnegie Mellon University (United States)
Tien-Hsin Chao, Jet Propulsion Laboratory (United States)

Program Committee

Mohammad Showkat Alam, University of South Alabama (United States)
Don A. Gregory, The University of Alabama in Huntsville (United States)
Bahram Javidi, University of Connecticut (United States)
B. V. K. Vijaya Kumar, Carnegie Mellon University (United States)
Yunlong Sheng, Université Laval (Canada)
Robert C. Stirbl, Jet Propulsion Laboratory (United States)
Ashit Talukder, National Institute of Standards and Technology (United States)
Shizhuo Yin, The Pennsylvania State University (United States)
Rupert C. Young, University of Sussex (United Kingdom)

Session Chairs

1 Invited Session on Optical Pattern Recognition
   David P. Casasent, Carnegie Mellon University (United States)

2 Object Classification and Detection
   Tien-Hsin Chao, Jet Propulsion Laboratory (United States)

3 Correlators for Optical Pattern Recognition
   Rupert C. Young, University of Sussex (United Kingdom)
   David P. Casasent, Carnegie Mellon University (United States)

4 Correlation Filters for Optical Pattern Recognition
   Ashit Talukder, National Institute of Standards and Technology (United States)
   Rupert C. Young, University of Sussex (United Kingdom)
Techniques and Applications

Mohammad Showkat Alam, University of South Alabama (United States)
Tien-Hsin Chao, Jet Propulsion Laboratory (United States)
