Event: SPIE Solar Energy + Technology, 2012, San Diego, California, United
States

PROCEEDINGS OF SPIE

Next Generation (Nano) Photonic and Cell Technologies for Solar Energy Conversion III

Loucas Tsakalakos
Editor

12–14 August 2012
San Diego, California, United States

Sponsored and Published by
SPIE

Volume 8471

Proceedings of SPIE 0277-786-786X, V.8471

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Next Generation (Nano) Photonic and Cell Technologies for Solar Energy Conversion III*, edited by Loucas Tsakalakos, Proceedings of SPIE Vol. 8471 (SPIE, Bellingham, WA, 2012) Article CID Number.

ISSN: 0277-786X

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/12/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

v *Conference Committee*

ADVANCED SOLAR ENERGY CONVERSION MECHANISMS I

- 8471 03 **Analysis on carrier energy relaxation in superlattices and its implications on the design of hot carrier solar cell absorbers** [8471-2]
Y. Feng, P. Aliberti, R. J. Patterson, B. P. Veettil, S. Lin, H. Xia, S. Shrestha, M. A. Green, G. J. Conibeer, The Univ. of New South Wales (Australia)

PHOTONIC STRUCTURES FOR SOLAR ENERGY CONVERSION I

- 8471 0A **Quantum wells and superlattices for III-V photovoltaics and photodetectors (Invited Paper)** [8471-10]
M. P. Lumb, The George Washington Univ. (United States) and U.S. Naval Research Lab. (United States); I. Vurgaftman, C. A. Affouda, J. R. Meyer, E. H. Aifer, R. J. Walters, U.S. Naval Research Lab. (United States)

NANO EXCITONIC SOLAR CELLS

- 8471 0B **Formation of silicon nanoparticles from high temperature annealed silicon rich silicon oxynitride films** [8471-11]
A. Slaoui, F. Ehrhardt, F. Delachat, G. Ferblantier, D. Muller, Institut d'Électronique du Solide et des Systèmes, CNRS (France)
- 8471 0D **Plasmonic-enhanced organic solar cells** [8471-13]
S. Shahin, P. Gangopadhyay, R. A. Norwood, College of Optical Sciences, The Univ. of Arizona (United States)

ADVANCED SOLAR ENERGY CONVERSION MECHANISMS III

- 8471 0K **Characteristic improvements of vertically aligned columnar quantum dot solar cell with a GaAsSb capping layer** [8471-21]
W.-S. Liu, H.-L. Tseng, T.-H. Huang, T.-F. Chu, P.-C. Kuo, F.-H. Tsao, Yuan Ze Univ. (Taiwan); J.-I. Chyi, National Central Univ. (Taiwan)
- 8471 0M **Effects of silicon nanowire morphology on optical properties and hybrid solar cell performance** [8471-20]
H.-J. Syu, S.-C. Shiu, National Taiwan Univ. (Taiwan); Y.-J. Hung, S.-L. Lee, National Taiwan Univ. of Science and Technology (Taiwan); C.-F. Lin, National Taiwan Univ. (Taiwan)

PHOTONIC STRUCTURES FOR SOLAR ENERGY CONVERSION II

- 8471 OO **Nano-imprinted rear-side diffraction gratings for absorption enhancement in solar cells** [8471-23]
A. Mellor, Univ. Politécnica de Madrid (Spain); H. Hauser, A. Guttowski, C. Wellens, B. Bläsi, Fraunhofer Institute for Solar Energy Systems ISE (Germany); I. Tobías, A. Martí, A. Luque, Univ. Politécnica de Madrid (Spain)

POSTER SESSION

- 8471 OS **Plasmon induced NIR response of thin-film α -Si:H solar cells** [8471-28]
F. Lükermann, U. Heinzmann, Univ. Bielefeld (Germany); H. Stiebig, Univ. Bielefeld (Germany) and Malibu GmbH & Co. KG (Germany)
- 8471 OT **Nanowire tandem solar cells** [8471-30]
R. Wang, Z. Zhou, Peking Univ. (China)
- 8471 OU **Plasmonic-grating-assisted absorption enhancement in thin film semiconductors** [8471-31]
M. A. Vincenti, D. de Ceglia, The Aegis Technologies Group, Inc. (United States); M. Scalora, Charles M. Bowden Research Ctr., AMSRD-AMR-WS-ST, RDECOM (United States)
- 8471 OW **Engineering of hybrid heterostructures from organic semiconductors and quantum dots for advanced photovoltaic applications** [8471-33]
S. Dayneko, Moscow Engineering Physics Institute (Russian Federation); M. Tedoradze, A.N. Frumkin Institute of Physical Chemistry and Electrochemistry (Russian Federation); M. Artemyev, Moscow Engineering Physics Institute (Russian Federation); I. Nabiev, Moscow Engineering Physics Institute (Russian Federation) and Trinity College (Ireland); A. A. Chistyakov, Moscow Engineering Physics Institute (Russian Federation)
- 8471 OX **Comparison of different vertically aligned ZnO nanostructures in excitonic solar cells: nanorods, nanocore-shells and nanotrees** [8471-34]
I. Gonzalez-Valls, M. Lira-Cantu, CIN2, CSIC (Spain)
- 8471 OZ **Surface plasmon enhanced P3HT:PCBM photovoltaic devices** [8471-37]
S. Zivanovic, A. Thapa, M. Koorie, S. Animilli, A. Gunasekaran, J. Melancon, D. Genov, Louisiana Tech Univ. (United States)

Author Index

Conference Committee

Symposium Chair

Martha Symko-Davies, National Renewable Energy Laboratory
(United States)

Conference Chair

Loucas Tsakalakos, GE Global Research (United States)

Conference Program Committee

Amanda J. Chatten, Imperial College London (United Kingdom)

Gavin J. Conibeer, The University of New South Wales (Australia)

Alberto Salleo, Stanford University (United States)

Sean E. Shaheen, University of Denver (United States)

Wilfried G. J. H. M. van Sark, Universiteit Utrecht (Netherlands)

Deli Wang, University of California, San Diego (United States)

Xianfan Xu, Purdue University (United States)

Edward T. Yu, The University of Texas at Austin (United States)

Session Chairs

- 1 Advanced Solar Energy Conversion Mechanisms I
Loucas Tsakalakos, GE Global Research (United States)
- 2 Photonic Structures for Solar Energy Conversion I
Xianfan Xu, Purdue University (United States)
- 3 Nano Excitonic Solar Cells
Sean E. Shaheen, University of Denver (United States)
- 4 Advanced Solar Energy Conversion Mechanisms II
Loucas Tsakalakos, GE Global Research (United States)
- 5 Advanced Solar Energy Conversion Mechanisms III
Xianfan Xu, Purdue University (United States)
- 6 Photonic Structures for Solar Energy Conversion II
Gavin J. Conibeer, The University of New South Wales (Australia)
