Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 1605-7422/13/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

ix	Conference Committee
xi	Introduction

SESSION 1 NANOPARTICLES AND NANOTHERAPY FOR CANCER I

- 8584 02 **Nanoparticles in medicine: selected observations and experimental caveats (Keynote Paper)** [8584-1]
S. Thomsen, Pathology Consultant to Physicists and Engineers (United States); J. A. Pearce, The Univ. of Texas at Austin (United States); A. Giustini, P. J. Hoopes, Dartmouth College (United States)
- 8584 03 **Imaging and modification of the tumor vascular barrier for improvement in magnetic nanoparticle uptake and hyperthermia treatment efficacy (Keynote Paper)** [8584-2]
P. J. Hoopes, Thayer School of Engineering at Dartmouth (United States) and Geisel School of Medicine (United States); A. A. Petryk, J. A. Tate, Thayer School of Engineering at Dartmouth (United States); M. S. Savellano, R. R. Strawbridge, Geisel School of Medicine (United States); A. J. Giustini, Thayer School of Engineering at Dartmouth (United States) and Geisel School of Medicine (United States); R. V. Stan, B. Gimi, Geisel School of Medicine (United States); M. Garwood, Univ. of Minnesota (United States)
- 8584 04 **New iron-oxide particles for magnetic nanoparticle hyperthermia: an *in-vitro* and *in-vivo* pilot study (Invited Paper)** [8584-37]
M. Hedayati, A. Attaluri, D. Bordelon, Johns Hopkins Univ. School of Medicine (United States); R. Goh, Nanomaterials Technology, Plc, Ltd. (Singapore); M. Armour, H. Zhou, C. Cornejo, M. Wabler, Y. Zhang, T. DeWeese, R. Ivkov, Johns Hopkins Univ. School of Medicine (United States)

SESSION 2 ABLATION AND TISSUE EFFECTS

- 8584 05 **Microwave tumor ablation: cooperative academic-industry development of a high-power gas-cooled system with early clinical results (Invited Paper)** [8584-5]
C. L. Brace, T. J. Ziemlewicz, Univ. of Wisconsin-Madison (United States); R. Schefelker, Neuwave Medical (United States); J. L. Hinshaw, M. G. Lubner, F. T. Lee Jr., Univ. of Wisconsin-Madison (United States)
- 8584 06 **Thermotolerance of human myometrium: implications for minimally invasive uterine therapies** [8584-6]
A. C. Thomas, B. T. Grisez, West Virginia Univ. School of Medicine (United States); K. McMillan, gRadiant Research (United States); N. Chill, T. P. Harclerode, R. Radabaugh, R. M. Jones, J. E. Coad, West Virginia Univ. School of Medicine (United States)
- 8584 07 **Determination of the ablation efficiencies of the laser irradiated tissues via rate of temperature change over time** [8584-7]
B. Tunç, M. Gülsoy, Bogaziçi Üniv. (Turkey)

- 8584 08 **Incisional effects of 1940 nm thulium fiber laser on oral soft tissues** [8584-8]
M. Güney, Istanbul Medeniyet Univ. (Turkey) and Bogaziçi Univ. (Turkey); B. Tunç, M. Gülsoy, Bogaziçi Univ. (Turkey)

SESSION 3 NUMERICAL MODELING AND TISSUE EFFECTS

- 8584 09 **Numerical models of cell death in RF ablation with monopolar and bipolar probes** [8584-9]
B. M. Bright, J. A. Pearce, The Univ. of Texas at Austin (United States)
- 8584 0A **Predicting tissue division rates for TURP systems using finite element simulations** [8584-10]
A. K. Ward, Covidien Surgical Solutions (United States); G. J. Collins, Colorado State Univ. (United States)

SESSION 4 NANOPARTICLES AND NANOTHERAPY FOR CANCER II

- 8584 0C **Targeting of systemically-delivered magnetic nanoparticle hyperthermia using a noninvasive, static, external magnetic field (Invited Paper)** [8584-12]
G. D. Zulauf, B. S. Trembly, Thayer School of Engineering at Dartmouth (United States); A. J. Giustini, Geisel School of Medicine (United States); B. R. Flint, Thayer School of Engineering at Dartmouth (United States); R. R. Strawbridge, P. J. Hoopes, Geisel School of Medicine (United States)

SESSION 5 NANOPARTICLES AND NANOTHERAPY FOR CANCER III

- 8584 0D **Preclinical dosimetry of magnetic fluid hyperthermia for bladder cancer** [8584-4]
T. R. Oliveira, Duke Univ. (United States) and Univ. de São Paulo (Brazil); P. R. Stauffer, C.-T. Lee, C. Landon, W. Etienne, P. F. Maccarini, B. Inman, M. W. Dewhirst, Duke Univ. (United States)
- 8584 0E **Understanding mNP hyperthermia for cancer treatment at the cellular scale** [8584-13]
R. V. Stigliano, F. Shubitidze, K. Kekalo, I. Baker, Thayer School of Engineering at Dartmouth (United States); A. J. Giustini, P. J. Hoopes, Thayer School of Engineering at Dartmouth (United States) and Dartmouth Medical School (United States)
- 8584 0F **Oxygen microenvironment affects the uptake of nanoparticles in head and neck tumor cells** [8584-14]
E. Y. Chen, Dartmouth-Hitchcock Medical Ctr. (United States) and Geisel School of Medicine (United States); S. Hodge, K. Tai, H. Hou, N. Khan, Dartmouth-Hitchcock Medical Ctr. (United States); P. J. Hoopes, K. S. Samkoe, Dartmouth-Hitchcock Medical Ctr. (United States), Geisel School of Medicine (United States) and Thayer School of Engineering at Dartmouth (United States)
- 8584 0G **Biodistribution of antibody-targeted and non-targeted iron oxide nanoparticles in a breast cancer mouse model** [8584-15]
J. A. Tate, W. Kett, C. NDong, K. E. Griswold, Thayer School of Engineering at Dartmouth (United States); P. J. Hoopes, Dartmouth Medical School (United States)

- 8584 OH **Improved delivery of magnetic nanoparticles with chemotherapy cancer treatment** [8584-16]
A. A. Petryk, Thayer School of Engineering at Dartmouth (United States); A. J. Giustini, Thayer School of Engineering at Dartmouth (United States) and Geisel School of Medicine (United States); R. E. Gottesman, Geisel School of Medicine (United States); P. J. Hoopes, Thayer School of Engineering at Dartmouth (United States) and Geisel School of Medicine (United States)
- 8584 OI **Biodistribution and imaging of fluorescently-tagged iron oxide nanoparticles in a breast cancer mouse model** [8584-17]
J. A. Tate, Thayer School of Engineering at Dartmouth (United States); M. D. Savellano, P. J. Hoopes, Dartmouth Medical School (United States)
- 8584 OJ **Iron oxide nanoparticle enhancement of radiation cytotoxicity** [8584-18]
C. M. Mazur, Brown Univ. (United States) and Thayer School of Engineering at Dartmouth (United States); J. A. Tate, R. R. Strawbridge, D. J. Gladstone, P. J. Hoopes, Thayer School of Engineering at Dartmouth (United States)

SESSION 6 TISSUE DEATH, SURVIVAL, AND ASSESSMENT

- 8584 OK **Hypothesis for thermal activation of the caspase cascade in apoptotic cell death at elevated temperatures (Keynote Paper)** [8584-19]
J. A. Pearce, The Univ. of Texas at Austin (United States)
- 8584 OL **Evolution of pathology techniques for evaluating energy-based tissue effects (Keynote Paper)** [8584-20]
B. T. Grisez, R. M. Jones, J. E. Coad, West Virginia Univ. School of Medicine (United States)
- 8584 OM **Tissue fusion bursting pressure and the role of tissue water content** [8584-21]
J. Cezo, E. Kramer, Univ. of Colorado at Boulder (United States); K. Taylor, Conmed Electrosurgery (United States); V. Ferguson, M. Rentschler, Univ. of Colorado at Boulder (United States)
- 8584 ON **Tissue sealing device associated thermal spread: a comparison of histologic methods for detecting adventitial collagen denaturation** [8584-22]
R. M. Jones, B. T. Grisez, A. C. Thomas, R. H. Livengood, J. E. Coad, West Virginia Univ. School of Medicine (United States)

SESSION 7 PLASMA MEDICINE: PHYSICS AND CLINICAL APPLICATIONS

- 8584 OO **Overview of plasma technology used in medicine (Invited Paper)** [8584-23]
T. P. Ryan, K. R. Stalder, J. Woloszko, ArthroCare Corp. (United States)
- 8584 OP **Some physics and chemistry of Coblation® electrosurgical plasma devices (Invited Paper)** [8584-24]
K. R. Stalder, T. P. Ryan, J. Woloszko, ArthroCare Corp. (United States)
- 8584 OQ **Clinical applications of plasma based electrosurgical systems (Invited Paper)** [8584-25]
J. Woloszko, A. Endler, T. P. Ryan, K. R. Stalder, ArthroCare Corp. (United States)

SESSION 8 IMAGE GUIDANCE, NAVIGATION, AND MONITORING FOR THERMAL THERAPY

- 8584 OR **Stable microwave radiometry system for long term monitoring of deep tissue temperature (Invited Paper)** [8584-26]
P. R. Stauffer, D. B. Rodrigues, S. Salahi, Duke Univ. (United States); E. Topsakal, Mississippi State Univ. (United States); T. R. Oliveira, A. Prakash, F. D'Isidoro, Duke Univ. (United States); D. Reudink, B. W. Snow, Thermimage Corp. (United States); P. F. Maccarini, Duke Univ. (United States)
- 8584 OS **Numerical 3D modeling of heat transfer in human tissues for microwave radiometry monitoring of brown fat metabolism** [8584-27]
D. B. Rodrigues, Duke Univ. (United States) and Univ. Nova de Lisboa (Portugal); P. F. Maccarini, Duke Univ. (United States); S. Salahi, Ansys, Inc. (United States); E. Colebeck, E. Topsakal, Mississippi State Univ. (United States); P. J. S. Pereira, Univ. Nova de Lisboa (Portugal) and Instituto Superior de Engenharia de Lisboa (Portugal); P. Limão-Vieira, Univ. Nova de Lisboa (Portugal); P. R. Stauffer, Duke Univ. (United States)
- 8584 OT **In situ treatment of liver using catheter based therapeutic ultrasound with combined imaging and GPS tracking (Invited Paper)** [8584-28]
G. Ghoshal, T. Heffter, E. Williams, Acoustic MedSystems, Inc. (United States); C. Bromfield, Univ. of Illinois (United States); V. Salgaonkar, Univ. of California, San Francisco (United States); L. Rund, J. M. Ehrhardt, Univ. of Illinois (United States); C. J. Diederich, Univ. of California, San Francisco (United States); E. C. Burdette, Acoustic MedSystems, Inc. (United States)
- 8584 OU **Targeted hyperthermia in prostate with an MR-guided endorectal ultrasound phased array: patient specific modeling and preliminary experiments** [8584-29]
V. A. Salgaonkar, P. Prakash, Univ. of California, San Francisco (United States); J. Plata, A. Holbrook, Stanford Univ. (United States); V. Rieke, J. Kurhanewicz, I.-C. Hsu, C. J. Diederich, Univ. of California, San Francisco (United States)

SESSION 9 ULTRASOUND MODELING AND THERMAL THERAPY

- 8584 OV **MR guided thermal therapy of pancreatic tumors with endoluminal, intraluminal and interstitial catheter-based ultrasound devices: preliminary theoretical and experimental investigations** [8584-30]
P. Prakash, V. A. Salgaonkar, S. J. Scott, P. Jones, D. Hensley, Univ. of California, San Francisco (United States); A. Holbrook, J. Plata, G. Sommer, Stanford Univ. (United States); C. J. Diederich, Univ. of California, San Francisco (United States)
- 8584 OW **Non-invasive estimation of thermal tissue properties by high-intensity focused ultrasound (Invited Paper)** [8584-31]
S. Appanaboyina, Medical Univ. of South Carolina (United States); A. Partanen, MR Clinical Science (United States); D. Haemmerich, Medical Univ. of South Carolina (United States)
- 8584 OX **Incorporating tissue absorption and scattering in rapid ultrasound beam modeling (Invited Paper)** [8584-32]
D. Christensen, S. Almquist, Univ. of Utah (United States)

8584 0Y **Ex-vivo and simulation comparison of multi-angular ablation patterns using catheter-based ultrasound transducers (Invited Paper)** [8584-33]
G. Ghoshal, Acoustic MedSystems, Inc. (United States); V. Salgaonkar, J. Wooton, Univ. of California, San Francisco (United States); E. Williams, P. Neubauer, L. Frith, B. Komadina, Acoustic MedSystems, Inc. (United States); C. Diederich, Univ. of California, San Francisco (United States); E. C. Burdette, Acoustic MedSystems, Inc. (United States)

8584 0Z **Interstitial ultrasound ablation of tumors within or adjacent to bone: contributions of preferential heating at the bone surface** [8584-34]
S. J. Scott, P. Prakash, V. Salgaonkar, P. D. Jones, R. N. Cam, M. Han, V. Rieke, Univ. of California, San Francisco (United States); E. C. Burdette, Acoustic MedSystems Inc. (United States); C. J. Diederich, Univ. of California, San Francisco (United States)

SESSION 10 NANOPARTICLES AND NANOTHERAPY FOR CANCER IV

8584 10 **Magnetic nanoparticle hyperthermia: predictive model for temperature distribution** [8584-35]
R. V. Stigliano, F. Shubitidze, A. A. Petryk, J. A. Tate, Thayer School of Engineering at Dartmouth (United States); P. J. Hoopes, Thayer School of Engineering at Dartmouth (United States) and Dartmouth Medical School (United States)

8584 11 **Development of a biodegradable iron oxide nanoparticle gel for tumor bed therapy** [8584-3]
B. P. Cunkelman, Thayer School of Engineering at Dartmouth (United States); E. Y. Chen, Geisel School of Medicine (United States) and Dartmouth-Hitchcock Medical Ctr. (United States); A. A. Petryk, J. A. Tate, Thayer School of Engineering at Dartmouth (United States); S. G. Thappa, Dartmouth-Hitchcock Medical Ctr. (United States); R. J. Collier, Thayer School of Engineering at Dartmouth (United States); P. J. Hoopes, Thayer School of Engineering at Dartmouth (United States), Geisel School of Medicine (United States) and Dartmouth-Hitchcock Medical Ctr. (United States)

8584 12 **Infrared thermography analysis of thermal diffusion induced by RF magnetic field on agar phantoms loaded with magnetic nanoparticles** [8584-36]
J. Bante-Guerra, J. D. Macías, Ctr. de Investigación y de Estudios Avanzados del Instituto Politécnico Nacional (Mexico); L. Caballero-Aguilar, Univ. Autónoma de Yucatán (Mexico); C. Vales-Pinzón, J. J. Alvarado-Gil, Ctr. de Investigación y de Estudios Avanzados del Instituto Politécnico Nacional (Mexico)

Author Index

Conference Committee

Symposium Chairs

James Fujimoto, Massachusetts Institute of Technology (United States)
R. Rox Anderson, Wellman Center for Photomedicine, Massachusetts General Hospital (United States) and Harvard School of Medicine (United States)

Program Track Chairs

Steven L. Jacques, Oregon Health & Science University (United States)
William P. Roach, U.S. Air Force (United States)

Conference Chair

Thomas P. Ryan, ArthroCare Corporation (United States)

Conference Program Committee

James E. Coad, West Virginia University (United States)
Chris J. Diederich, University of California, San Francisco (United States)
P. Jack Hoopes, Dartmouth Medical School (United States)
Paul R. Stauffer, Duke University (United States)
Sharon L. Thomsen, Pathology Consultant to Engineers and Physicists (United States)
John A. Pearce, The University of Texas at Austin (United States)

Session Chairs

- 1 Nanoparticles and Nanotherapy for Cancer I
Thomas P. Ryan, ArthroCare Corporation (United States)
- 2 Ablation and Tissue Effects
Christopher L. Brace, University of Wisconsin-Madison (United States)
- 3 Numerical Modeling and Tissue Effects
Dieter Haemmerich, Medical University of South Carolina (United States)
- 4 Nanoparticles and Nanotherapy for Cancer II
John A. Pearce, The University of Texas at Austin (United States)

- 5 Nanoparticles and Nanotherapy for Cancer III
John A. Pearce, The University of Texas at Austin (United States)
- 6 Tissue Death, Survival, and Assessment
Sharon L. Thomsen, Pathology Consultant to Engineers and Physicists
(United States)
- 7 Plasma Medicine: Physics and Clinical Applications
E. Clif Burdette, Acoustic Medsystems, Inc. (United States)
- 8 Image Guidance, Navigation, and Monitoring for Thermal Therapy
Chris J. Diederich, University of California, San Francisco (United
States)
- 9 Ultrasound Modeling and Thermal Therapy
Douglas A. Christensen, The University of Utah (United States)
- 10 Nanoparticles and Nanotherapy for Cancer IV
James E. Coad, West Virginia University (United States)

Introduction

Welcome to the Proceedings of the 2013 SPIE Conference: *Energy-Based Treatment of Tissue and Assessment VII*. This is the 15th year we have had this conference with SPIE. Our very first session was titled: *Surgical Applications of Energy*.

This year we had a variety of papers covering energy-based devices and techniques in Medicine. Over 35 presentations were made and the publications associated with those talks make up another great collection of SPIE Proceedings. We had a number of papers covering Nanoparticles in the treatment of cancer, with fabrication, imaging, modeling, cell effects and biodistribution, as well as the effects of external electrical and magnetic fields to activate and in some cases provide heat dosing. There were a number of ablation devices covering RF, microwave, and ultrasound for thermal therapy. For the first time there was a session on Plasma Medicine and the effects including bactericide, tissue healing, and tissue ablation (removal) and reshaping with non-thermal surgical technologies. There were also vessel sealing papers that cover models and the use of a valuable surgical technique enabled by recent technology. As always, we see the evolution of treatment technologies being guided by GPS devices in the patient, aided by image guidance. Radiometric techniques and MRI also demonstrated noninvasive thermal assessment technologies meant to be used in real time, concurrent with treatment. Lastly, it was valuable to have companies present their latest technologies and show how surgeons and interventional radiologists are using these devices for the treatment of patients.

Thomas P. Ryan
