Front Matter: Volume 9319
Optical Tomography and Spectroscopy of Tissue XI

Bruce J. Tromberg
Arjun G. Yodh
Eva M. Sevick-Muraca
Robert R. Alfano
Editors

9–11 February 2015
San Francisco, California, United States

Sponsored and Published by
SPIE
The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

ISSN: 1605-7422
ISBN: 9781628414097

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:
- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.
**Contents**

<table>
<thead>
<tr>
<th>SESSION 1</th>
<th>NEW CLINICAL APPLICATIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td>9319 02</td>
<td>A MD-NIR interactance based wireless sensing platform for the measurement of a subcutaneous fat thickness: a pilot study [9319-1]</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SESSION 2</th>
<th>BRAIN, NEURO, AND FUNCTIONAL IMAGING I</th>
</tr>
</thead>
<tbody>
<tr>
<td>9319 07</td>
<td>Atlas-based high-density diffuse optical tomography for imaging the whole human cortex [9319-6]</td>
</tr>
<tr>
<td>9319 08</td>
<td>Evidence of ventricular contamination of the optical signal in preterm neonates with post hemorrhagic ventricle dilation [9319-7]</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SESSION 3</th>
<th>BREAST IMAGING I</th>
</tr>
</thead>
<tbody>
<tr>
<td>9319 0B</td>
<td>A portable and compact near-infrared spectral tomography system for predicting breast tumor response to neoadjuvant chemotherapy [9319-10]</td>
</tr>
<tr>
<td>9319 0C</td>
<td>Dynamic diffuse optical tomography for assessing changes of breast tumors during neoadjuvant chemotherapy [9319-11]</td>
</tr>
<tr>
<td>9319 0E</td>
<td>Tumor vascular reactivity as a marker to predict tumor response to chemotherapy [9319-13]</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SESSION 4</th>
<th>BREAST IMAGING II</th>
</tr>
</thead>
<tbody>
<tr>
<td>9319 0J</td>
<td>Optical mammography instrument for broadband spectral imaging with depth discrimination [9319-18]</td>
</tr>
<tr>
<td>9319 0K</td>
<td>Diffuse optical imaging of the breast using structured-light [9319-19]</td>
</tr>
<tr>
<td>9319 0L</td>
<td>Broadband optical mammography: breast tissue thickness compensation algorithm [9319-20]</td>
</tr>
</tbody>
</table>
### SESSION 5  BRAIN, NEURO, AND FUNCTIONAL IMAGING II

<table>
<thead>
<tr>
<th>Session</th>
<th>Title</th>
<th>Reference</th>
</tr>
</thead>
<tbody>
<tr>
<td>9319 0N</td>
<td>Dynamic cerebral autoregulation measured with coherent hemodynamics spectroscopy (CHS) (Invited Paper) [9319-22]</td>
<td></td>

</table>
Implementation of 3D prostrate ring-scanning mechanism for NIR diffuse optical imaging phantom validation [9319-74]

A reduced-space basis function neural network method for diffuse optical tomography [9319-77]

Vertical-cavity surface-emitting laser (VCSEL) sources for frequency domain photon migration [9319-81]

The effect and correction of reference heterogeneity in diffuse optical tomography [9319-83]

Development of a robust and fast calibration procedure for diffuse optical tomography [9319-84]
Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

James G. Fujimoto, Massachusetts Institute of Technology
(United States)

R. Rox Anderson, Wellman Center for Photomedicine, Massachusetts General Hospital (United States) and Harvard School of Medicine (United States)

Program Track Chairs

Tuan Vo-Dinh, Fitzpatrick Institute for Photonics, Duke University (United States)

Anita Mahadevan-Jansen, Vanderbilt University (United States)

Conference Chairs

Bruce J. Tromberg, Beckman Laser Institute and Medical Clinic (United States)

Arjun G. Yodh, University of Pennsylvania (United States)

Eva Marie Sevick-Muraca, The University of Texas Health Science Center at Houston (United States)

Conference Co-chair

Robert R. Alfano, The City College of New York (United States)

Conference Program Committee

Samuel Achilefu, Washington University School of Medicine in St. Louis (United States)

David A. Boas, Massachusetts General Hospital (United States)

Sergio Fantini, Tufts University (United States)

Marco Ferrari, Università degli Studi dell’Aquila (Italy)

Amir H. Gandjbakhche, National Institutes of Health (United States)

Jeremy C. Hebden, University College London (United Kingdom)

Andreas H. Hielscher, Columbia University (United States)

Jana M. Kainerstorfer, Tufts University (United States)

Anand T. N. Kumar, Athinoula A. Martinos Center for Biomedical Imaging (United States)

Frederic Leblond, Ecole Polytechnique de Montréal (Canada)

Mark J. Niedre, Northeastern University (United States)

Brian W. Pogue, Dartmouth College (United States)

Darren M. Roblyer, Boston University (United States)

Quing Zhu, University of Connecticut (United States)
Session Chairs

1. New Clinical Applications
   Amir Gandjbakhche, National Institutes of Health (United States)

2. Brain, Neuro, and Functional Imaging I
   Joseph P. Culver, Washington University School of Medicine in St. Louis (United States)

3. Breast Imaging I
   Ashwin B. Parthasarathy, University of Pennsylvania (United States)
   So Hyun Chung, University of Pennsylvania (United States)

4. Breast Imaging II
   Darren M. Roblyer, Boston University (United States)

5. Brain, Neuro, and Functional Imaging II
   Sergio Fantini, Tufts University (United States)

6. Fluorescence I
   Mark J. Niedre, Northeastern University (United States)

7. Fluorescence II
   Gultekin Gulsen, University of California, Irvine (United States)

8. Advances in Instrumentation and Technology I
   Thomas D. O'Sullivan, University of California, Irvine (United States)

9. Theory, Algorithms, and Modeling
   Hamid Dehghani, The University of Birmingham (United Kingdom)

10. Pre-Clinical / Clinical Applications
    Jae Gwan Kim, Gwangju Institute of Science and Technology (Korea, Republic of)

11. Advances in Time Domain Techniques
    Rinaldo Cubeddu, Politecnico di Milano (Italy)

12. Advances in Instrumentation and Technology II
    Jana M. Kainerstorfer, Tufts University (United States)
