

PROCEEDINGS OF SPIE

Applications of Digital Image Processing XL

Andrew G. Tescher
Editor

7–10 August 2017
San Diego, California, United States

Sponsored and Published by
SPIE

Volume 10396
Part One of Two Parts

Proceedings of SPIE 0277-786X, V. 10396

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Applications of Digital Image Processing XL, edited by Andrew G. Tescher, Proc. of SPIE
Vol. 10396, 1039601 · © 2017 SPIE · CCC code: 0277-786X/17/\$18 · doi: 10.1117/12.2293188

Proc. of SPIE Vol. 10396 1039601-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Applications of Digital Image Processing XL*, edited by Andrew G. Tescher, Proceedings of SPIE Vol. 10396 (SPIE, Bellingham, WA, 2017) Seven-digit Article CID Number.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIEDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix	<i>Authors</i>
xiii	<i>Conference Committee</i>

Part One

SESSION 1	IMAGE RESTORATION AND TRACKING
10396 02	Joint denoising, demosaicing, and chromatic aberration correction for UHD video [10396-2]
10396 03	A hardware architecture for real-time shadow removal in high-contrast video [10396-3]
10396 05	Image quality assessment for determining efficacy and limitations of Super-Resolution Convolutional Neural Network (SRCNN) [10396-5]
10396 06	The role of optical flow in automated quality assessment of full-motion video [10396-6]
SESSION 2	FUTURE VIDEO I
10396 07	Prediction of HDR quality by combining perceptually transformed display measurements with machine learning [10396-7]
10396 09	Performance comparison of AV1, HEVC, and JVET video codecs on 360 (spherical) video [10396-9]
SESSION 3	FUTURE VIDEO II
10396 0B	Verification testing of the compression performance of the HEVC screen content coding extensions [10396-11]
10396 0C	JPEG XS-based frame buffer compression inside HEVC for power-aware video compression [10396-12]
10396 0D	FastVDO enhancements of the AV1 codec and comparison to HEVC and JVET codecs [10396-13]
10396 0E	Advanced single-stream HDR coding using JVET JEM with backward compatibility options [10396-14]
10396 0F	Novel inter and intra prediction tools under consideration for the emerging AV1 video codec [10396-15]
10396 0G	Novel modes and adaptive block scanning order for intra prediction in AV1 [10396-16]

- 10396 OH **Display of high dynamic range images under varying viewing conditions** [10396-17]
- 10396 OI **Spherical rotation orientation indication for HEVC and JEM coding of 360 degree video** [10396-18]

SESSION 4 LOW-LATENCY LIGHTWEIGHT IMAGE COMPRESSION

- 10396 OM **JPEG XS, a new standard for visually lossless low-latency lightweight image compression** [10396-21]
- 10396 ON **Overview of the JPEG XS objective evaluation procedures** [10396-22]
- 10396 OO **New procedures to evaluate visually lossless compression for display systems** [10396-23]
- 10396 OP **JPEG XS call for proposals subjective evaluations** [10396-24]
- 10396 OQ **High-speed, low-complexity video coding with EDiCTius: a DCT coding proposal for JPEG XS** [10396-25]
- 10396 OR **Parallel efficient rate control methods for JPEG 2000** [10396-26]
- 10396 OS **Lossless medical image compression through lightweight binary arithmetic coding** [10396-27]
- 10396 OT **FBCOT: a fast block coding option for JPEG 2000** [10396-28]
- 10396 OU **A new display stream compression standard under development in VESA** [10396-29]

SESSION 5 VR AND 360 VIDEO

- 10396 OV **A novel projection for omni-directional video** [10396-30]
- 10396 OW **Intra prediction using face continuity in 360-degree video coding** [10396-31]
- 10396 OX **Segment scheduling method for reducing 360° video streaming latency** [10396-32]
- 10396 OY **An ROI multi-resolution compression method for 3D-HEVC** [10396-33]
- 10396 OZ **Key factors for a high-quality VR experience** [10396-34]
- 10396 12 **Discontinuity minimization for omnidirectional video projections** [10396-37]
- 10396 13 **Measuring quality of omnidirectional high dynamic range content** [10396-38]
- 10396 14 **True 3D digital holographic tomography for virtual reality applications** [10396-39]

SESSION 6 MEDICAL IMAGING

- 10396 15 **Forming intermediate spatial resolution of microscopy images for continuous zooming on multi-resolution processing system** [10396-40]
- 10396 16 **Hough transform for clustered microcalcifications detection in full-field digital mammograms** [10396-41]
- 10396 18 **A multi-layer MRI description of Parkinson's disease** [10396-44]
- 10396 19 **Machine learning for the assessment of Alzheimer's disease through DTI** [10396-45]
- 10396 1A **Association between MRI structural features and cognitive measures in pediatric multiple sclerosis** [10396-46]
- 10396 1B **Brain's tumor image processing using shearlet transform** [10396-47]
- 10396 1C **Demyelinating and ischemic brain diseases: detection algorithm through regular magnetic resonance images** [10396-48]
- 10396 1D **Analysis of breast thermograms for ROI extraction and description using mathematical morphology** [10396-49]

SESSION 7 PLENOPTIC IMAGING

- 10396 1E **Weighted bi-prediction for light field image coding** [10396-50]
- 10396 1F **A new framework for interactive quality assessment with application to light field coding** [10396-51]

Part Two

- 10396 1G **Liborg: a lidar-based robot for efficient 3D mapping** [10396-52]
- 10396 1H **On the performance of metrics to predict quality in point cloud representations** [10396-53]
- 10396 1I **A new similarity measure for complex amplitude holographic data** [10396-54]
- 10396 1J **Computer-generated holographic near-eye display system based on LCoS phase only modulator** [10396-55]

SESSION 8 OBJECT DETECTION AND TRACKING

- 10396 1L **3D+T motion analysis with nanosensors** [10396-59]
- 10396 1M **Low-complexity object detection with deep convolutional neural network for embedded systems** [10396-60]

10396 1N **An embedded system for face classification in infrared video using sparse representation**
[10396-61]

POSTER SESSION

10396 1R **Dynamic frame resizing with convolutional neural network for efficient video compression**
[10396-63]

10396 1T **Application of multi-scale segmentation algorithms for high resolution remote sensing image** [10396-65]

10396 1V **Blind image quality evaluation using the conditional histogram patterns of divisive normalization transform coefficients** [10396-67]

10396 1W **A research of road centerline extraction algorithm from high resolution remote sensing images** [10396-68]

10396 1Y **Siamese convolutional networks for tracking the spine motion** [10396-70]

10396 2I **Real-time heart rate measurement for multi-people using compressive tracking** [10396-73]

10396 2J **Vision-based mobile robot navigation through deep convolutional neural networks and end-to-end learning** [10396-74]

10396 2K **A locally adaptive algorithm for shadow correction in color images** [10396-75]

10396 2L **Tracking of multiple objects with time-adjustable composite correlation filters** [10396-76]

10396 2M **Fast perceptual image hash based on cascade algorithm** [10396-77]

10396 2N **Removal of impulse noise clusters from color images with local order statistics** [10396-78]

10396 2O **Impulsive noise removal from color video with morphological filtering** [10396-79]

10396 2P **Application of white-light phase-shifting in white-light scanning interferometry** [10396-80]

10396 2Q **Edge detection for optical synthetic aperture based on deep neural network** [10396-81]

10396 2A **Accurate generation of the 3D map of environment with a RGB-D camera** [10396-82]

10396 2B **Veterinary software application for comparison of thermograms for pathology evaluation**
[10396-83]

10396 2D **Texture analysis integrated to infrared light sources for identifying high fringe concentrations in digital photoelasticity** [10396-85]

10396 2E **Robot path planning algorithm based on symbolic tags in dynamic environment** [10396-86]

10396 2F **Application of speckle-field images processing for concrete hardening diagnostics**
[10396-87]

10396 2G	Transform extension for block-based hybrid video codec with decoupling transform sizes from prediction sizes and coding sizes [10396-88]
10396 2I	Robot mapping algorithm based on Kalman filtering and symbolic tags [10396-90]
10396 2J	An efficient point-to-plane registration algorithm for affine transformations [10396-91]
10396 2K	A generalized Condat's algorithm of 1D total variation regularization [10396-92]
10396 2L	Convolutional neural networks and face recognition task [10396-93]
10396 2M	System of multifunctional Jones matrix tomography of phase anisotropy in diagnostics of endometriosis [10396-94]
10396 2N	Azimuthally invariant Mueller-matrix mapping of biological optically anisotropic network [10396-95]
10396 2O	Polarization-interference mapping of biological fluids polycrystalline films in differentiation of weak changes of optical anisotropy [10396-96]
10396 2P	Methods and means of 3D diffuse Mueller-matrix tomography of depolarizing optically anisotropic biological layers [10396-97]
10396 2Q	Feature recognition of metal salt spray corrosion based on color spaces statistics analysis [10396-98]
10396 2R	New opportunities of differential diagnosis of biological tissues polycrystalline structure using methods of Stokes correlometry mapping of polarization inhomogeneous images [10396-99]
10396 2T	Resolution analysis of archive films for the purpose of their optimal digitization and distribution [10396-101]
10396 2U	An efficient direct method for image registration of flat objects [10396-102]
10396 2V	Smoothing of astronomical images with Poisson distribution [10396-103]
10396 2W	A modified iterative closest point algorithm for noisy data [10396-104]
10396 2X	Estimation of Poisson noise in spatial domain [10396-105]
10396 2Z	Efficient encryption of image data in video sequences using discrete orthogonal moments [10396-107]
10396 3I	The relationship between the retinal image quality and the refractive index of defects arising in IOL: numerical analysis [10396-109]
10396 3J	Analysis of image reconstruction artifacts in structured illumination microscopy [10396-110]
10396 3K	FPGA implementation of image dehazing algorithm for real time applications [10396-111]

- 10396 34 **Radiometric calibration of wide-field camera system with an application in astronomy**
[10396-112]
- 10396 35 **Robust parameterization of time-frequency characteristics for recognition of musical**
genres of Mexican culture [10396-113]
- 10396 37 **Text detection in natural scenes with phase congruency approach** [10396-115]
- 10396 38 **Enhancing user experience by using multi-sensor data fusion to predict phone's luminance**
[10396-116]
- 10396 39 **Global stereo matching algorithm based on disparity range estimation** [10396-117]
- 10396 3A **The error analysis of the handheld target in Target-based Vision Measurement System (T-**
VMS) [10396-118]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.
