Volume 11377

Proceedings of SPIE 0277-786X, V. 11377

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Behavior and Mechanics of Multifunctional Materials XIV, edited by Ryan L. Harne, Proc. of SPIE
Vol. 11377, 1137701 · © 2020 SPIE · CCC code: 0277-786X/20/\$21 · doi: 10.1117/12.2572572

iii

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Behavior and Mechanics of Multifunctional Materials XIV*, edited by Ryan L. Harne, Proceedings of SPIE Vol. 11377 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

IT STARTED WITH DOGEARS BUT DIDN'T STOP UNTIL I WATERBOMBED: THE ORIGAMI SESSION

- 11377 08 **Aerodynamic mitigation of origami-inspired building structures subjected to hurricane wind loads [11377-8]**

MULTIFUNCTIONAL MATERIAL MATTERS

- 11377 0A **Modeling, experimental characterization, and uncertainty quantification of auxetic foams: hyperelastic and fractional viscoelastic mechanics (Best Student Paper Award) [11377-10]**
- 11377 0C **Tailoring the ferroelectric properties of ZrO₂ ultrathin films by interfacial engineering [11377-12]**

INGREDIENTS, MIXING, AND BAKING: A SESSION FOR SMART PARTICULATE COMPOSITES AND NOT PASTRIES

- 11377 0F **An experimental exploration of deformation-dependent AC conductivity in carbon nanofiber-modified epoxy [11377-18]**

SMART, FANCY, AND FUNCTIONAL: A SESSION ON MULTIFUNCTIONAL STRUCTURES AND MATERIAL SYSTEMS I

- 11377 0H **Broadening band gaps in an electromechanical metamaterial rod by resonant electromagnetic shunt and inter-resonator coupling [11377-22]**
- 11377 0I **Fabrication and characterization of lead-free functionally graded piezocomposites [11377-24]**
- 11377 0J **Analysis and development of a ferroelectret cellular PP film [11377-25]**
- 11377 0K **Dynamic characterization of a bio-inspired variable stiffness multi-winglet device [11377-26]**

WHAT GOES AROUND COMES AROUND: A SESSION FOR SHAPE MEMORY MATERIALS

- 11377 0L **A direct comparison of shape memory alloy and electromechanical actuation for wing twist applications [11377-27]**
- 11377 0M **Additive manufacturing of shape memory NiTi thin films [11377-28]**

- 11377 ON **Self-folding origami of prestrained shape memory polymer by resistive Joule-heating**
[11377-29]
- 11377 OQ **Visual stress sensing using dynamic porosity in shape memory thermoplastic elastomers**
[11377-32]

SMART, FANCY, AND FUNCTIONAL: A SESSION ON MULTIFUNCTIONAL STRUCTURES AND MATERIALS SYSTEMS II

- 11377 OR **Design of tailorable stiffness structures using L-system topology optimization** [11377-33]
- 11377 OS **Preliminary investigation of self-sensing in piezoelectric bistable laminates** [11377-34]
- 11377 OT **Composite piezoelectric resonator 1D modeling with loss** [11377-35]

SLOW AND STEADY WINS THE RACE: AN ADDITIVE MANUFACTURING SESSION

- 11377 OU **Two-dimensional mechanical metamaterials with adjustable stiffness and damping** [11377-37]
- 11377 OV **Study on the influence of post-processing parameters over microstructure and metallurgical properties of NiTi alloy** [11377-40]

SMART WIRES, AND FIBERS, AND BARS, OH MY!

- 11377 14 **Numerical simulation of recentering beam-column joints reinforced with superelastic Ni-Ti shape memory alloy bars** [11377-49]
- 11377 15 **Effect of tension-compression asymmetry and partial transformation on the response of shape memory alloy beam structures** [11377-50]

POSTER SESSION

- 11377 19 **Determination of residual stress for Inconel 718 samples fabricated through different scanning strategies in selective laser melting** [11377-38]
- 11377 1A **Analysis of the deviation in properties of selective laser melted samples fabricated by varying process parameters** [11377-39]
- 11377 1B **Investigation of the strength of different porous lattice structures manufactured using selective laser melting** [11377-55]
- 11377 1D **The effect of support structure geometry on surface topography of selectively laser melted parts** [11377-57]

11377 1E **Metal-graphene nano-composites with enhanced mechanical properties** [11377-58]
