Front Matter: Volume 11824

, "Front Matter: Volume 11824," Proc. SPIE 11824, New Concepts in Solar and Thermal Radiation Conversion IV, 1182401 (3 September 2021); doi: 10.1117/12.2606264

Event: SPIE Optical Engineering + Applications, 2021, San Diego, California, United States

PROCEEDINGS OF SPIE

New Concepts in Solar and Thermal Radiation Conversion IV

Peter Bermel
Jeremy N. Munday
Editors

1–5 August 2021
San Diego, California, United States

Sponsored and Published by
SPIE

Volume 11824

Proceedings of SPIE 0277-786X, V. 11824

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

New Concepts in Solar and Thermal Radiation Conversion IV, edited by Peter Bermel,
Jeremy N. Munday, Proc. of SPIE Vol. 11824, 1182401 · © 2021 SPIE
CCC code: 0277-786X/21/\$21 · doi: 10.1117/12.2606264

Proc. of SPIE Vol. 11824 1182401-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](https://spiedigitallibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *New Concepts in Solar and Thermal Radiation Conversion IV*, edited by Peter Bermel, Jeremy N. Munday, Proc. of SPIE 11824, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

NOVEL PHOTONIC MATERIALS AND STRUCTURES FOR ENHANCING PHOTOVOLTAICS

11824 03	Conducting polymer based hybrid cells for concurrent solar energy harvesting and charge storage [11824-4]
11824 04	Performance enhancement of ultra-thin TMDC-based photovoltaic systems for space applications [11824-5]
11824 05	N719 and D149 dyes: appropriate sensitizers for bare SnO₂ and MgO coated SnO₂ based dye-sensitized solar cells [11824-1]
11824 07	Hybrid photovoltaic-supercapacitors: effect of the counter electrode on the device performance [11824-6]

NOVEL PHOTONIC DESIGNS FOR THERMAL MANAGEMENT

11824 0A	Rugate filters for evacuated thermal collectors: IR mirror for improvement of energy conversion efficiency [11824-11]
11824 0C	Ultra-efficient and ultra-rapid solar cell de-icing and de-snowing (Invited Paper) [11824-19]
