Front Matter: Volume 11884

, "Front Matter: Volume 11884," Proc. SPIE 11884, International Symposium on Artificial Intelligence and Robotics 2021, 1188401 (28 October 2021); doi: 10.1117/12.2613394

Event: International Symposium on Artificial Intelligence and Robotics 2021, 2021, Fukuoka, Japan

PROCEEDINGS OF SPIE

International Symposium on Artificial Intelligence and Robotics 2021

**Huimin Lu
Shenglin Mu
Shota Nakashima**
Editors

**21–27 August 2021
Fukuoka, Japan**

Organized by
International Society for Artificial Intelligence and Robotics

Sponsored by
IEEE Computer Society Big Data Technical Committee
Kyushu Institute of Technology (Japan)

Technical Cosponsor and Publisher
SPIE

Volume 11884

Proceedings of SPIE 0277-786X, V. 11884

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

International Symposium on Artificial Intelligence and Robotics 2021, edited by Huimin Lu,
Shenglin Mu, Shota Nakashima, Proc. of SPIE Vol. 11884, 1188401 · © 2021 SPIE
CCC code: 0277-786X/21/\$21 · doi: 10.1117/12.2613394

Proc. of SPIE Vol. 11884 1188401-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIEDigitalLibrary.org](https://spiedigitallibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Symposium on Artificial Intelligence and Robotics 2021*, edited by Huimin Lu, Shenglin Mu, Shota Nakashima, Proc. of SPIE 11884, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

INTERNATIONAL SYMPOSIUM ON ARTIFICIAL INTELLIGENCE AND ROBOTICS 2021

11884 02	Remaining useful life prediction of lithium-ion batteries based on support vector regression optimized and grey wolf optimizations [11884-2]
11884 03	A prediction method for population density in key areas [11884-3]
11884 04	BASNet: improving semantic segmentation via boundary-assistant symmetrical network (Invited Paper) [11884-4]
11884 05	Simulations and experiments for the dynamic engagement characteristics of the wet clutch [11884-9]
11884 06	A trajectory tracking method of mobile robot based on sliding mode control and disturbance observer [11884-10]
11884 08	The design and realization of performance test of video apps based on Android [11884-16]
11884 09	Review of online fault diagnosis methods for the power transmissions [11884-17]
11884 0A	Real-time research on functional distributed computer network interconnection [11884-20]
11884 0B	An efficient multimodal transport transaction settlement system based on block chain [11884-21]
11884 0C	Application and prospect of blockchain and smart contract technology in pharmaceutical supply chain [11884-22]
11884 0D	Salient object detection based on Drosophila vision-inspired model [11884-26]
11884 0E	Bear fault diagnosis based on multiscale feature learning [11884-29]
11884 0F	Stock price prediction via image-based DCNN with CBAM [11884-30]
11884 0G	Innovation of heavy industry enterprise management model [11884-38]
11884 0H	A hybrid and regenerative model chat robot based on LSTM and attention model [11884-39]
11884 0I	A novel single image reflection removal method (Invited Paper) [11884-49]
11884 0J	Image target classification detection [11884-34]

- 11884 OK **Underwater image super-resolution using SRCNN [11884-35]**
- 11884 OL **Appearance-based gaze estimation with multi-modal convolutional neural networks [11884-36]**
- 11884 OM **Image quality improvement using local adaptive neighborhood-based dark channel prior [11884-40]**
- 11884 ON **Review of the intelligent fault-location in the transmission line [11884-41]**
- 11884 OO **DoS-resisting two-factor remote authentication and key exchange scheme with user anonymity for mobile communication [11884-42]**
- 11884 OP **Shape restoration by shadow information and photometric stereo [11884-46]**
- 11884 OQ **An artificial bee colony algorithm with an improved updating strategy [11884-47]**
- 11884 OR **Center heatmap attention for few-shot object detection [11884-48]**
- 11884 OS **Proposal of automatic trash system of pet sheet for driving [11884-51]**
- 11884 OT **A new biometric-based, mutual authenticated certificateless key agreement protocol for telecare medical information system [11884-52]**
- 11884 OU **A review of natural language processing for financial technology [11884-54]**
- 11884 OV **Improved transfer learning based on EMD for Parkinson's diagnosis [11884-55]**
- 11884 OW **Research on the technology of optical motion capture system for robot inspection [11884-56]**
- 11884 OX **An adaptive anchor neural network for defect detection in aluminum profiles images [11884-58]**
- 11884 OY **Customer data privacy protection method based on singular value decomposition clustering algorithm [11884-60]**
- 11884 OZ **A Grey Wolf optimization algorithm with its application on the controller placement problem [11884-61]**
- 11884 IO **Retinex based underwater image enhancement using attenuation compensated color balance and gamma correction [11884-62]**
- 11884 II **PET-CT images co-segmentation of lung tumor using joint level set model [11884-63]**
- 11884 I2 **Multi-scale underwater object tracking by adaptive feature fusion [11884-64]**

- 11884 13 **The data sharing security system of cloud storage** [11884-65]
- 11884 14 **The spatial data sharing security model based on hybrid encryption algorithm** [11884-66]
- 11884 15 **Online-GCN: an online interactive segmentation method based on graph convolutional network** [11884-67]
- 11884 16 **The correlation analysis model of information security events based on the adaptive optimization algorithm** [11884-68]
- 11884 17 **Bayesian estimation of the inverted Beta-Liouville mixture models with extended variational inference** [11884-69]
- 11884 18 **Visual relation of interest detection based on part detection** [11884-70]
- 11884 19 **Multi-task infrared pedestrian detection method** [11884-71]
- 11884 1A **Comparison of grape flower counting using patch-based instance segmentation and density-based estimation with convolutional neural networks** [11884-72]
- 11884 1B **Information transmission system based on visual recognition between internal and external networks under physical isolation** [11884-74]
- 11884 1C **Research on stability and accuracy of the OptiTrack system based on mean error** [11884-75]
- 11884 1D **Tag generation method based on topic information** [11884-76]
- 11884 1E **RLGC: residual low rank group sparsity constraint for image denoising** [11884-77]
- 11884 1F **Power consumption behavior analysis based on cluster analysis** [11884-78]
- 11884 1G **Multi-agent reinforcement learning for prostate localization based on multi-scale image representation** [11884-79]
- 11884 1H **Object tracking based on response maps fusion Siamese network** [11884-81]
- 11884 1I **Research on object tracking algorithm via adaptive multi-feature fusion** [11884-82]
- 11884 1J **Depression recognition based on text and facial expression** [11884-85]
- 11884 1K **Research on artificial intelligence analysis technology for microscopic characteristics of shale gas reservoir (Invited Paper)** [11884-86]
- 11884 1L **Using VIVE tracker to detect the trajectory of mobile robots** [11884-87]
- 11884 1M **Numerical simulation of cruise ship cabin fire based on FDS** [11884-89]

11884 1N	Non-convex penalty based multimodal medical image fusion via sparse tensor factorization [11884-88]
11884 1O	Temperature prediction based on LSTM-ELM network under wide and narrow band fusion [11884-90]
11884 1P	Research on path tracking control method of unmanned surface vehicle based on deep reinforcement learning [11884-91]
11884 1Q	A hybrid architecture of DenseNet201 and XGBoost to detect tuberculosis from chest x-ray [11884-92]
11884 1R	Improved threshold recognition of the coal and the gangue by using x-ray image [11884-93]
11884 1S	Automatic small target detection in complex background: a state of-the-art survey [11884-94]
11884 1T	Variational local gradient threshold driven convex optimization for single image reflection suppression [11884-95]
11884 1U	Attention mutual teaching network for unsupervised domain adaptation person re-identification [11884-96]
11884 1V	Pedestrian detection based on I-HOG feature [11884-99]
11884 1W	Passive video surveillance system [11884-100]
11884 1X	Context-aware network for pulmonary nodule detection in CT images [11884-101]
11884 1Y	A small object detection algorithm based on improved faster RCNN [11884-102]
11884 1Z	Multicast beamforming planning based on massive MIMO antenna array [11884-103]
