ix Conference Committee

NOVEL METHODS I

12053 02 A study on the detection and monitoring of weak areas in wafer using massive 2D and 3D measurement data [12053-8]
12053 03 New metrology technique for measuring patterned wafer geometry on a full 300mm wafer [12053-9]
12053 04 GHz half wavelength contact acoustic microscopy (HaWaCAM): a feasibility study [12053-10]
12053 05 Enhancement of acoustic-wave induced reflection changes through surface plasmon polaritons [12053-11]

SEM I

12053 06 Throughput vs. yield: reviewing the metrology needs for stochastics-aware process window analysis (SA-PWA) (Invited Paper) [12053-13]
12053 07 Probabilistic process window: a new approach to focus-exposure analysis [12053-14]
12053 08 Highlighting stochastic manifestations in 193 nm immersion lithography with contour-based metrology metrics (Karel Urbanek Best Student Paper Award) [12053-17]
12053 09 Low dosage SEM image processing for metrology applications [12053-18]
12053 0A Simulating process subtleties in SEM imaging [12053-19]

EPE/OVERLAY I

12053 0B Fast and robust overlay metrology from visible to infrared wavelengths using dark-field digital holographic microscopy [12053-25]
12053 0C Enabling on-device and target-free overlay measurement from CD-SEM contours [12053-26]
12053 0D Overlay challenges in 3D heterogeneous integration [12053-27]
Overlay stability control in IBO measurement using rAIM target

INSPECTION CHALLENGES

Identification of sub-20 nm EUV defects with nano-IR PiFM
High-speed wafer magnetic field inspection for semiconductor manufacturing
EUV mask defect material characterization through actinic lensless imaging
Defect detection and classification on imec iN5 node BEoL test vehicle with MultiSEM
Ultra-high throughput e-beam inspection for DRAM high aspect ratio storage node defect detection
Unbiased roughness measurements from low signal-to-noise ratio SEM images

GAA AND NANOSHEET

Recess metrology challenges for 3D device architectures in advanced technology nodes
Inferred measurement of subsurface nanosheet structures using scanning probe microscopy, solving the inverse problem

EUV CHALLENGES

Optical overlay metrology trends in advanced nodes
Metrology of thin resist for high NA EUVL
Low-voltage aberration-corrected SEM metrology of thin resist for high-NA EUVL
Outlier analysis for understanding process variations and probable defects

OPTICAL CD

Vertical travelling scatterometry for metrology on fully integrated devices

### LATE BREAKING NEWS

| 12053 15 | Absolute overlay measurement based on voltage contrast defect inspection with programmed misalignments for DRAM devices [12053-149] |
| 12053 16 | Improved multi-lot overlay performance via phase-based ADI overlay measurements [12053-154] |

### POSTER SESSION

| 12053 17 | Efficient cross-sectional evaluation method of three-dimensional NAND flash memory by cooperation of coherence scanning interferometry and scanning electron microscopy [12053-57] |
| 12053 18 | Overcome machine to machine overlay for better scanner mix-run control [12053-61] |
| 12053 19 | A comprehensive study of scanner alignment mark quantity and layout-dependent effect for overlay performance optimization [12053-62] |
| 12053 1A | New DRAM application space for optical AEI metrology enabled by ASML self reference (ASR) targets [12053-65] |
| 12053 1B | Virtual cross metrology: leveraging process sequence for improved process characterization [12053-68] |
| 12053 1C | Metrology test artifact availability improvement [12053-70] |
| 12053 1D | High-performance denoiser based on deep learning trained by precisely reproduced SEM noise [12053-71] |
| 12053 1E | Prediction and optimization of small scatterometry based overlay targets [12053-72] |
| 12053 1G | Model-based contour extraction: an enabler for very low-frame SEM images metrology [12053-75] |
| 12053 1H | OPO reduction in scatterometry metrology by rotated quadrupole illumination [12053-77] |
| 12053 1I | Adopting combined feed forward solution in HVM fab to improve on product overlay [12053-78] |
| 12053 1J | Spatial frequency analysis of LER and LWR to tune SADP process [12053-79] |
| 12053 1K | Image-based alignment sensor unaffected by aberration [12053-86] |
| 12053 1L | Exposure process optimization using machine learning overlay prediction [12053-87] |
Computational metrology introduction into high volume manufacturing fab through 1x nm uDBO measurement and monitor

An automated system for detecting systematic defect in memory cell array

Reduction in on-product overlay random error using machine learning algorithm

In device overlay control with multiple overlay metrology in 3D-NAND process

Machine learning modeling using process context and exposure data for overlay prediction

Application of machine learning-based metrology for writer main pole CD measurement by CDSEM

Improved fab-out EDS prediction of memory device using effective accuracy equation

Using pattern analysis to improve wafer inspection flow

In-line monitoring of overlay and process window using design-assisted voltage contrast inspection for 14nm FinFET technology

An in-depth look at comprehensive and efficient methodology for CD uniformity budget breakdown

Predicting overlay mark performance based on process emulation and optical simulation

A novel target optimization methodology for 3D NAND overlay measurement improvement

Fast generation of SEM images including charging effect by neural network

Spectral analysis overlay measurement approach for improvement of overlay accuracy in advanced integrated circuits

Trilayer hardmask lithography and etch for BEOL manufacturing

Real-time monitoring of acetic acid and PGMEA in a photolithographic multifunction chemical filter using a laser-based multi-species VOC analyzer

Process optimization by virtual target design in overlay metrology

Real-time monitoring of critical AMC compounds in the photolithography cell using a novel laser-based, multi-species detection system

Depth measurement using high-voltage SEM that changes the inclination of the incident beam
12053 25  Efficient metrology for edge placement error (EPE) characterization using design for inspection methodology [12053-119]

12053 26  Chemical metrology: a novel approach to measuring critical airborne molecular contamination in photolithography and track tools in real-time [12053-120]

12053 27  Automated extraction of critical dimension from SEM with Weave [12053-121]

12053 28  Conducting a metrology measurement using M-FOUP system in fab environment [12053-124]

12053 29  A new development algorithm to optimize scanner alignment sampling for cross-chuck overlay performance optimization [12053-152]

12053 2A  Advanced dose control using random logic device patterns and massive metrology in a foundry high-volume manufacturing environment [12053-155]
Conference Committee

Symposium Chair
Kafai Lai, University of Hong Kong (United States)

Symposium Co-Chair
Qinghuang Lin, LAM Research Corporation (United States)

Conference Chair
John C. Robinson, KLA Corporation (United States)

Conference Co-Chair
Matthew J. Sendelbach, TEL Technology Ctr., America, LLC (United States)

Conference Program Committee
Ofer Adan, Applied Materials Israel, Ltd. (Israel)
John A. Allgair, BRIDG (United States)
Masafumi Asano, Tokyo Electron Ltd. (Japan)
Bryan M. Barnes, National Institute of Standards and Technology (United States)
Cornel Bozdog, Micron Technology, Inc. (United States)
Benjamin D. Bunday, AMAG Consulting, LLC (United States)
Xiaomeng Chen, Taiwan Semiconductor Manufacturing Company Ltd. (Taiwan)
Hugo Cramer, ASML Netherlands B.V. (Netherlands)
Timothy F. Crimmins, Intel Corporation (United States)
Shunsuke Koshihara, Hitachi High-Technologies Corporation (Japan)
Yi-Sha Ku, Industrial Technology Research Institute (Taiwan)
Byoung-Ho Lee, SK hynix, Inc. (Korea, Republic of)
Myungjun Lee, SAMSUNG Electronics Co., Ltd. (Korea, Republic of)
Philippe Leray, IMEC (Belgium)
Narendra Rana, Western Digital Corporation (United States)
Christopher J. Raymond, Onto Innovation Inc. (United States)
Daniel Schmidt, IBM Thomas J. Watson Research Center (United States)
Nivea G. Schuch, ASELTA Nanographics (France)
Alexander Starikov, I&I Consulting (United States)
Alok Vaid, GLOBALFOUNDRIES Inc. (United States)
