Volume 7423

Proceedings of SPIE, 0277-786X, v. 7423

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/09/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE
Digital Library

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii	Conference Committee
ix	Introduction

SESSION 1 TAILORED AND OPTIMIZED OPTICS AT THE ÉTENDUE LIMIT I

- 7423 02 **Designing freeform reflectors for extended sources** [7423-01]
F. R. Fournier, Univ. of Central Florida (United States); W. J. Cassarly, Optical Research Associates (United States); J. P. Rolland, Univ. of Central Florida (United States) and Univ. of Rochester (United States)
- 7423 03 **Free form V-groove reflector design with the SMS method (Invited Paper)** [7423-02]
D. Grabovičkić, Technical Univ. of Madrid (Spain); J. C. Miñano, P. Benítez, Technical Univ. of Madrid (Spain) and Light Prescriptions Innovators (United States)
- 7423 04 **Sensitivity to figure error of a freeform refractive beam shaper** [7423-03]
V. Oliker, Emory Univ. (United States)
- 7423 05 **Illumination system design in a project-based course (Invited Paper)** [7423-04]
R. J. Koschel, College of Optical Sciences, The Univ. of Arizona (United States) and Photon Engineering LLC (United States); V. Abraham, J. Kim, R. Liu, S. Richardson, S. Namnabat, A. Czajkowski, R. H. Abd El-Maksoud, R. Irvin, T. Nakazawa, M. Kudenov, M. Dawsey, E. de Leon, L. Wang, K. Crabtree, R. M. Orr, B. Primeau, Y. Kim, College of Optical Sciences, The Univ. of Arizona (United States)
- 7423 06 **Novel aplanatic design method** [7423-32]
W. Zhang, R. Winston, Univ. of California, Merced (United States)

SESSION 2 TAILORED AND OPTIMIZED OPTICS AT THE ÉTENDUE LIMIT II

- 7423 07 **Field method for concentrator design** [7423-05]
Á. García-Botella, Univ. Politécnica de Madrid (Spain); A. Á. Fernández-Balbuena, D. Vázquez-Moliní, E. Bernabeu, A. González-Cano, Univ. Complutense de Madrid (Spain)
- 7423 08 **Thermodynamic efficiency of nonimaging concentrators (Invited Paper)** [7423-07]
N. Shatz, J. Bortz, Science Applications International Corp. (United States); R. Winston, Univ. of California, Merced (United States)
- 7423 09 **Beating the optical Liouville theorem: How does geometrical optics know the second law of thermodynamics?** [7423-33]
R. Winston, C. Wang, W. Zhang, Univ. of California, Merced (United States)

SESSION 3 TAILORED AND OPTIMIZED OPTICS AT THE ÉTENDUE LIMIT III

- 7423 0B **Full landscape of aplanatic optics for concentration near the thermodynamic limit** [7423-09]
N. Ostroumov, J. M. Gordon, D. Feuermann, Ben-Gurion Univ. of the Negev (Israel)

SESSION 4 HIGH-CONCENTRATION SOLAR OPTICS I

- 7423 0C **Optical waveguide system for solar power applications in space** [7423-10]
T. Nakamura, Physical Sciences Inc. (United States)
- 7423 0D **Collimator design for extended sources (Invited Paper)** [7423-11]
H. P. Annen, L. Fu, R. Leutz, Concentrator Optics GmbH (Germany)

SESSION 5 HIGH-CONCENTRATION SOLAR OPTICS II

- 7423 0F **Nonimaging solar thermal collector for high temperature terrestrial and space applications**
[7423-13]
M. Mouzouris, M. J. Brooks, Univ. of KwaZulu-Natal (South Africa)
- 7423 0G **Development and testing of high concentration flat-plate Fresnel lenses** [7423-14]
M. Z. Shvarts, Ioffe Physico-Technical Institute (Russian Federation); A. A. Soluyanov,
Technoexan Ltd. (Russian Federation)
- 7423 0H **Truncation of the secondary concentrator (CPC) between maximum performances and
economical requirements** [7423-15]
A. Segal, M. Epstein, Weizmann Institute of Science (Israel)

SESSION 6 SOLAR DAYLIGHTING OPTICS

- 7423 0I **An optical coupler of natural light guiding system based on stepped structure** [7423-16]
P.-H. Pan, Y.-Y. Chen, A. J.-W. Whang, National Taiwan Univ. of Science and Technology
(Taiwan)
- 7423 0J **Using prismatic structure and brightness enhancement film to design cascable unit of
static solar concentrator in natural light guiding system** [7423-17]
S.-H. Yang, Y.-Y. Chen, A. J.-W. Whang, National Taiwan Univ. of Science and Technology
(Taiwan)
- 7423 0K **Recent research on anidolic daylighting systems: highly reflective coating materials and
chronobiological properties (Invited Paper)** [7423-18]
F. Linhart, Solar Energy and Building Physics Lab., EPFL (Switzerland); S. K. Wittkopf, Solar
Energy and Building Physics Lab., EPFL (Switzerland) and Solar Energy Research Institute of
Singapore, National Univ. of Singapore (Singapore); M. Münch, J.-L. Scartezini, Solar Energy
and Building Physics Lab., EPFL (Switzerland)
- 7423 0L **A low-cost rugged solution for solar lighting** [7423-19]
A. N. Bharathwaj, Jerusalem College of Engineering (India); B. Srinivasan, Indian Institute of
Technology (India)

SESSION 7 LED AND ILLUMINATION OPTICS

- 7423 ON **Improving the color uniformity of a LED-array based illumination system with a tailored light distribution** [7423-21]
Y. Meuret, Vrije Univ. Brussel (Belgium); L. Lanoye, F. Bruyneel, Philips Consumer Lifestyle (Belgium); H. Thienpont, Vrije Univ. Brussel (Belgium)
- 7423 OO **Design and evaluation of natural light guiding system in ecological illumination of traffic tunnel** [7423-22]
C.-N. Chen, Y.-Y. Chen, A. J.-W. Whang, National Taiwan Univ. of Science and Technology (Taiwan); L.-H. Chen, National Taipei Univ. of Technology (Taiwan)
- 7423 OP **Pixelated wall washers** [7423-23]
B. A. Salters, M. P. C. M. Krijn, Philips Research (Netherlands)
- 7423 OQ **Light source modulation using light guide rods** [7423-24]
A. Domhardt, S. Wendel, Univ. of Karlsruhe (Germany); U. Rohlfing, Univ. of Applied Sciences Darmstadt (Germany); U. Lemmer, Univ. of Karlsruhe (Germany)

POSTER SESSION

- 7423 OS **High pumping-efficiency and wideband L-band erbium-doped fiber ASE source using two-stage double-pass backward pumping configuration** [7423-26]
B. Zheng, Univ. of North Carolina at Charlotte (United States); W. Huang, Xiamen Univ. (China)
- 7423 OT **Skylight: a hollow prismatic CPC** [7423-27]
A. A. Fernandez-Balbuena, D. Vázquez-Moliní, B. Garcia-Fernandez, Univ. Complutense de Madrid (Spain); A. Garcia-Botella, Univ. Politécnica de Madrid (Spain); E. Bernabeu, Univ. Complutense de Madrid (Spain)
- 7423 OU **Analysis of a hybrid cost-effective solar lighting system** [7423-28]
X. Shen, Y. Sun, Y. Wei, S. Zhong, F. Li, S. Lin, J. Li, X. Meng, Y. Wang, Guangxi Univ. (China)
- 7423 OV **LED beam shaping using microlens arrays** [7423-29]
Y.-C. Lee, H.-T. Hsieh, National Taiwan Univ. (Taiwan); W.-Y. Hsu, Instrument Technology Research Ctr. (Taiwan); G.-D. J. Su, National Taiwan Univ. (Taiwan)
- 7423 OW **Cylindrically symmetric Fresnel lens for high concentration photovoltaics** [7423-30]
Y.-T. Hung, G.-D. Su, National Taiwan Univ. (Taiwan)
- 7423 OX **Optical design of a new combo solar concentrator** [7423-31]
C. P. Liu, H. Y. Lin, C. T. Hsiao, Yuan Ze Univ. (Taiwan)
- 7423 OY **Generation of uniform illumination using faceted reflectors** [7423-34]
L. Wang, J. M. Sasián, P. Su, R. J. Koshe, College of Optical Sciences, The Univ. of Arizona (United States)

- 5 High-Concentration Solar Optics II
Ralf Leutz, Concentrator Optics GmbH (Germany)

- 6 Solar Daylighting Optics
Pablo Benítez, Universidad Politécnica de Madrid (Spain) and Light
Prescriptions Innovators LLC (United States)
- 7 LED and Illumination Optics
William J. Cassarly, Optical Research Associates (United States)

Introduction

Nonimaging Optics began in the mid-1960's with the discovery that optical systems could approach the thermodynamic limit of light collection (the sine law of concentration). The subject has more in common with radiation heat transfer than classical optics. One class of design methods employs "strings" (in analogy with "Hottel strings" used to calculate radiative transfer between furnace walls). Another postulates that mirrors placed along the flow-lines of Poincare's integral invariants can produce ideal light-guiding systems. Each conference has a theme. In 2009, there were impressive new results with the SMS method. A renewed interest in aplanatic designs was also in evidence. A deeper connection between the two will undoubtedly be a topic for the next conference. There was renewed respect for the power of thermodynamics to illuminate optical design and performance. And finally, the recognition of Nonimaging Optics with the A. E. Conrady Award is evidence the field is growing up.
