Volume 7550

Proceedings of SPIE, 1605-7422, v. 7550

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 1605-7422/10/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

xv	Introduction

OPHTHALMIC TREATMENT MONITORING AND ASSESSMENT

- 7550 02 **Three-dimensional multimodal microscopy of rabbit cornea after cross-linking treatment** [7550-01]
A. Krüger, Laser Zentrum Hannover e.V. (Germany); M. Hovakimyan, Universitätsaugenklinik, Univ. Rostock (Germany); D. F. Ramírez, R.-A. Lorbeer, Laser Zentrum Hannover e.V. (Germany); M. Kröger, O. Stachs, Universitätsaugenklinik, Univ. Rostock (Germany); A. Wree, Institut für Anatomie, Univ. Rostock (Germany); R. F. Guthoff, Universitätsaugenklinik, Univ. Rostock (Germany); H. Lubatschowski, A. Heisterkamp, Laser Zentrum Hannover e.V. (Germany)
- 7550 03 **Internal limiting membrane layer visualization and vitreoretinal surgery guidance using a common-path OCT integrated microsurgical tool** [7550-02]
X. Liu, E. Meisne, J.-H. Han, K. Zhang, The Johns Hopkins Univ. (United States); P. Gehlbach, Wilmer Eye Institute, Johns Hopkins Univ. School of Medicine (United States); R. Taylor, J. U. Kang, The Johns Hopkins Univ. (United States)

PRESBYOPIA AND CATARACT

- 7550 07 **Measurement of vibrations induced on the surface of crystalline eye lens using PhS-SDOCT** [7550-06]
N. Sudheendran, V. R. Manne, R. K. Manapuram, S. A. Baranov, Univ. of Houston (United States); S. Aglyamov, S. Emelianov, The Univ. of Texas at Austin (United States); K. V. Larin, Univ. of Houston (United States) and Saratov State Univ. (Russian Federation)
- 7550 0A **Extended depth of focus intra-ocular lens: a solution for presbyopia and astigmatism** [7550-10]
A. Zlotnik, I. Raveh, S. Ben Yaish, O. Yehezkel, Xceed Imaging Ltd. (Israel); M. Belkin, Goldshleger Eye Research Institute, Tel-Aviv Univ. (Israel); Z. Zalevsky, Bar-Ilan Univ. (Israel)

KEYNOTE SESSION

- 7550 0B **Technology needs for the development of the accommodative intraocular lens (Keynote Paper)** [7550-100]
O. Nishi, Nishi Eye Hospital (Japan)

OPHTHALMIC IMAGING AND DIAGNOSTICS: FUNCTIONAL

- 7550 0D **Rapid line-scan confocal imaging of retinal activation** [7550-13]
Y.-G. Li, X.-C. Yao, The Univ. of Alabama at Birmingham (United States)

- 7550 OE **High-sensitive blood flow imaging of the retina and choroid by using double-beam optical coherence angiography** [7550-14]
S. Makita, M. Yamanari, Univ. of Tsukuba (Japan) and Computational Optics and Ophthalmology Group (Japan); M. Miura, Tokyo Medical Univ. Ibaraki Medical Ctr. (Japan) and Computational Optics and Ophthalmology Group (Japan); Y. Yasuno, Univ. of Tsukuba (Japan) and Computational Optics and Ophthalmology Group (Japan)
- 7550 OF **Flicker stimulated retinal perfusion changes assessed with high-speed Doppler tomography** [7550-15]
T. Schmoll, A. S. G. Singh, K. Frily, C. Blatter, Medizinische Univ. Wien (Austria); M. Villiger, C. Pache, T. Lasser, Lab. d'Optique Biomedicale, Ecole Polytechnique Fédérale de Lausanne (Switzerland); R. A. Leitgeb, Medizinische Univ. Wien (Austria)
- 7550 OG **True velocity mapping using joint spectral and time domain optical coherence tomography** [7550-16]
I. Grulkowski, M. Szkulmowski, D. Bukowska, S. Tamborski, I. Gorczynska, A. Kowalczyk, M. Wojtkowski, Nicolaus Copernicus Univ. (Poland)
- 7550 OH **Perfusion measures from dynamic ICG scanning laser ophthalmoscopy** [7550-17]
S. Larkin, Lickenbrock Technologies, LLC (United States); A. Invernizzi, Univ. of Milan (Italy); D. Beecher, Lickenbrock Technologies, LLC (United States); G. Staurengi, Univ. of Milan (Italy); T. Holmes, Lickenbrock Technologies, LLC (United States)

OCULAR BIOMETRY

- 7550 OM **A novel scanning method for large scan depth anterior segment OCT** [7550-22]
R. Yadav, G. Yoon, Institute of Optics, Univ. of Rochester (United States) and Flaum Eye Institute, Univ. of Rochester (United States)

OPHTHALMIC IMAGING: POLARIZATION

- 7550 OO **Polarization sensitive corneal and anterior segment swept-source optical coherence tomography** [7550-24]
Y. Lim, M. Yamanari, Y. Yasuno, Univ. of Tsukuba (Japan) and Computational Optics and Ophthalmology Group (Japan)
- 7550 OP **Tissue discrimination in anterior eye using three optical parameters obtained by polarization sensitive optical coherence tomography** [7550-25]
A. Miyazawa, M. Yamanari, S. Makita, Univ. of Tsukuba (Japan) and Computational Optics and Ophthalmology Group (Japan); M. Miura, Tokyo Medical Univ. (Japan) and Computational Optics and Ophthalmology Group (Japan); K. Kawana, Institute of Clinical Medicine, Univ. of Tsukuba (Japan) and Computational Optics and Ophthalmology Group (Japan); K. Iwaya, National Defense Medical College (Japan); H. Gotoh, Tokyo Medical Univ. (Japan); Y. Yasuno, Univ. of Tsukuba (Japan) and Computational Optics and Ophthalmology Group (Japan)

- 7550 OR **Quantification of retinal lesions by polarization sensitive optical coherence tomography** [7550-27]
C. K. Hitzenberger, B. Baumann, E. Götzinger, M. Pircher, H. Sattmann, Medizinische Univ. Wien (Austria); C. Ahlers, C. Schütze, F. Schlanitz, U. Schmidt-Erfurth, Allgemeines Krankenhaus der Stadt Wien(Austria) and Medizinische Univ. Wien (Austria)

OPHTHALMIC LASER-TISSUE INTERACTIONS

- 7550 OU **Visualizing of fs laser pulse induced micro-incisions inside crystalline lens tissue** [7550-30]
O. Stachs, Univ. Rostock (Germany); S. Schumacher, Laser Zentrum Hannover e.V. (Germany); M. Kröger, Univ. Rostock (Germany); H. Hoffmann, M. Fromm, A. Heisterkamp, H. Lubatschowski, Laser Zentrum Hannover e.V. (Germany); R. F. Guthoff, Univ. Rostock (Germany)
- 7550 OV **Improved safety of retinal photocoagulation with a shaped beam and modulated pulse** [7550-31]
C. Sramek, J. Brown, Y. M. Paulus, H. Nomoto, D. Palanker, Stanford Univ. (United States)
- 7550 OW **Selective retinal therapy with a continuous line scanning laser** [7550-32]
Y. M. Paulus, A. Jain, R. F. Gariano, H. Nomoto, Stanford Univ. School of Medicine (United States); G. Schuele, OptiMedica Corp. (United States); C. Sramek, Stanford Univ. (United States); R. Charalel, Stanford Univ. School of Medicine (United States); D. Palanker, Stanford Univ. School of Medicine (United States) and Stanford Univ. (United States)
- 7550 OX **Experimental retinectomy with a 6.1 μ m Q-switched Raman-shifted alexandrite laser** [7550-33]
K. M. Joos, R. Prasad, Vanderbilt Eye Institute (United States); J. Kozub, B. Ivanov, Vanderbilt Univ. (United States); A. Agarwal, J. H. Shen, Vanderbilt Eye Institute (United States)

OPHTHALMIC ADAPTIVE OPTICS I: RETINAL IMAGING

- 7550 OZ **Retinal imaging with a combined adaptive optics/optical coherence tomography and adaptive optics/scanning laser ophthalmoscopy system** [7550-36]
R. J. Zawadzki, Vision Science and Advanced Retinal Imaging Lab., Univ. of California, Davis (United States) and UC Davis Eye Ctr., Univ. of California, Davis (United States); S. M. Jones, Lawrence Livermore National Lab. (United States); S. Pilli, D. Y. Kim, Vision Science and Advanced Retinal Imaging Lab., Univ. of California, Davis (United States) and UC Davis Eye Ctr., Univ. of California, Davis (United States); S. S. Olivier, Lawrence Livermore National Lab. (United States); J. S. Werner, Vision Science and Advanced Retinal Imaging Lab., Univ. of California, Davis (United States) and UC Davis Eye Ctr., Univ. of California, Davis (United States)
- 7550 IO **Imaging retinal nerve fiber bundles at ultrahigh-speed and ultrahigh-resolution using OCT with adaptive optics** [7550-37]
O. P. Kocaoglu, Indiana Univ. (United States); B. Cense, Utsunomiya Univ. (Japan); Q. Wang, J. Bruestle, J. Besecker, W. Gao, R. Jonnal, D. T. Miller, Indiana Univ. (United States)

- 7550 11 **Multimodal adaptive optics for depth-enhanced high-resolution ophthalmic imaging (Best Paper Award)** [7550-35]
D. X. Hammer, M. Mujat, N. V. Iftimia, N. Lue, R. D. Ferguson, Physical Sciences Inc. (United States)

OPHTHALMIC ADAPTIVE OPTICS II: VISION CORRECTION

- 7550 12 **Adaptive optics for the correction of eye aberrations** [7550-38]
A. Hansen, M. K. Khattab, R.-A. Lorbeer, Laser Zentrum Hannover e.V. (Germany);
R. R. Krueger, Cole Eye Institute, The Cleveland Clinic Foundation (United States);
H. Lubatschowski, Laser Zentrum Hannover e.V. (Germany)
- 7550 13 **Novel applications of an adaptive optics visual simulator in the clinical setting** [7550-39]
R. R. Krueger, A. Abdala, Cole Eye Institute, The Cleveland Clinic Foundation (United States);
K. Rocha, Cole Eye Institute, The Cleveland Clinic Foundation (United States) and Federal
Univ. of São Paulo (Brazil); N. Chateau, L. Vabre, Imagine Eyes (France)
- 7550 14 **Binocular adaptive optics visual simulator: understanding the impact of aberrations on actual vision** [7550-40]
E. J. Fernández, P. M. Prieto, P. Artal, Univ. de Murcia (Spain)
- 7550 15 **Hybrid adaptive optics visual simulator combining a liquid crystal phase modulator and a deformable mirror** [7550-41]
P. M. Prieto, C. Cánovas, S. Manzanera, A. Mira, P. Artal, Univ. de Murcia (Spain)

OPHTHALMIC IMAGING: ANIMAL MODELS

- 7550 16 **Small animal ocular biometry using optical coherence tomography** [7550-42]
M. Ruggeri, O. Kocaoglu, S. Uhlhorn, D. Borja, R. Urs, T.-H. Chou, Bascom Palmer Eye Institute, Univ. of Miami Miller School of Medicine (United States) and Biomedical Optics Lab., Univ. of Miami (United States); V. Porciatti, Bascom Palmer Eye Institute, Univ. of Miami Miller School of Medicine (United States); J.-M. Parel, Bascom Palmer Eye Institute, Univ. of Miami Miller School of Medicine (United States), Biomedical Optics Lab., Univ. of Miami (United States), and Vision Cooperative Research Ctr. (Australia); F. Manns, Bascom Palmer Eye Institute, Univ. of Miami Miller School of Medicine (United States) and Biomedical Optics Lab., Univ. of Miami (United States)
- 7550 17 **Ultrahigh-speed imaging of the rat retina using ultrahigh-resolution spectral/Fourier domain OCT** [7550-43]
J. J. Liu, Massachusetts Institute of Technology (United States); B. Potsaid, Massachusetts Institute of Technology (United States) and Thorlabs, Inc. (United States); Y. Chen, I. Gorczynska, Massachusetts Institute of Technology (United States) and New England Eye Ctr., Tufts Medical Ctr., Tufts Univ. (United States); V. J. Srinivasan, Massachusetts Institute of Technology (United States); J. S. Duker, New England Eye Ctr., Tufts Medical Ctr., Tufts Univ. (United States); J. G. Fujimoto, Massachusetts Institute of Technology (United States)

- 7550 19 **An adaptive-optics scanning laser ophthalmoscope for imaging murine retinal microstructure** [7550-45]
C. Alt, D. P. Biss, Wellman Ctr. for Photomedicine, Massachusetts General Hospital, Harvard Medical School (United States); N. Tajouri, Massachusetts Eye and Ear Infirmary, Harvard Medical School (United States) and Schepens Eye Research Institute (United States); T. C. Jakobs, Massachusetts Eye and Ear Infirmary, Harvard Medical School (United States); C. P. Lin, Wellman Ctr. for Photomedicine, Massachusetts General Hospital, Harvard Medical School (United States)
- 7550 1A **Imaging of mouse embryonic eye development using optical coherence tomography** [7550-46]
S. H. Syed, A. Kasiraj, Univ. of Houston (United States); I. V. Larina, M. E. Dickinson, Baylor College of Medicine (United States); K. V. Larin, Univ. of Houston (United States)
- 7550 1B **Structural and biochemical characterization of the rat retina with combined Raman spectroscopy-spectral domain optical coherence tomography (RS-SDOCT)** [7550-47]
C. A. Patil, Vanderbilt Univ. (United States); J. Kalkman, D. Faber, Amsterdam Medical Ctr. (Netherlands); J. S. Penn, Vanderbilt Univ. Medical Ctr. (United States); T. G. van Leeuwen, Amsterdam Medical Ctr. (Netherlands); A. Mahadevan-Jansen, Vanderbilt Univ. (United States)

OPHTHALMIC IMAGING: CELLULAR, RESOLUTION, SPEED, PENETRATION I

- 7550 1D **Real-time mapping of the corneal sub-basal nerve plexus by in vivo laser scanning confocal microscopy** [7550-49]
R. F. Guthoff, A. Zhivov, O. Stachs, Univ. Rostock (Germany)
- 7550 1E **Fully automated corneal endothelial morphometry of images captured by clinical specular microscopy** [7550-50]
C. Bucht, St. Erik Eye Hospital, Karolinska Institutet (Sweden); P. Söderberg, Uppsala Univ. (Sweden); G. Manneberg, Royal Institute of Technology (Sweden)

OPHTHALMIC IMAGING: CELLULAR, RESOLUTION, SPEED, PENETRATION II

- 7550 1G **Low-cost, high-resolution scanning laser ophthalmoscope for the clinical environment** [7550-52]
P. Soliz, VisionQuest Biomedical, LLC (United States); A. Larichev, Moscow State Univ. (Russian Federation); G. Zamora, S. Murillo, E. S. Barriga, VisionQuest Biomedical, LLC (United States)
- 7550 1H **Spectrally encoded confocal scanning laser ophthalmoscope** [7550-53]
Y. K. Tao, J. A. Izatt, Duke Univ. (United States)

- 7550 1K **Ultrahigh-speed volumetric ophthalmic OCT imaging at 850nm and 1050nm** [7550-56]
B. Potsaid, Massachusetts Institute of Technology (United States) and Thorlabs Inc. (United States); J. Liu, Massachusetts Institute of Technology (United States); V. Manjunath, New England Eye Ctr., Tufts Medical Ctr., Tufts Univ. (United States); I. Gorczynska, Massachusetts Institute of Technology (United States) and New England Eye Ctr., Tufts Medical Ctr., Tufts Univ. (United States); V. J. Srinivasan, Massachusetts Institute of Technology (United States); J. Jiang, S. Barry, A. Cable, Thorlabs Inc. (United States); J. S. Duker, New England Eye Ctr., Tufts Medical Ctr., Tufts Univ. (United States); J. G. Fujimoto, Massachusetts Institute of Technology (United States) and New England Eye Ctr., Tufts Medical Ctr., Tufts Univ. (United States)

POSTER SESSION

- 7550 1M **Characterization of corneal edema by forward and backward second harmonic generation microscopy** [7550-58]
C.-M. Hsueh, W. Lo, W.-L. Chen, V. A. Hovhannisyan, National Taiwan Univ. (Taiwan); H.-Y. Tan, Institute of Medical Engineering, National Taiwan Univ. (Taiwan) and Chang Gung Memorial Hospital, Chang Gung Univ. (Taiwan); C.-Y. Dong, National Taiwan Univ. (Taiwan)
- 7550 1N **Automated image classification applied to reconstituted human corneal epithelium for the early detection of toxic damage** [7550-59]
G. F. Crosta, C. Urani, Univ. degli Studi di Milano-Bicocca (Italy); B. De Servi, M. Meloni, VitroScreen Srl (Italy)
- 7550 1O **Segmentation of ophthalmic optical coherence tomography images using graph cuts** [7550-60]
X. T. Li, S. J. Chiu, Duke Univ. (United States); P. Nicholas, Duke Univ. Medical Ctr. (United States); C. A. Toth, Duke Univ. Medical Ctr. (United States) and Duke Univ. (United States); J. A. Izatt, Duke Univ. (United States) and Duke Univ. Medical Ctr. (United States); S. Farsiu, Duke Univ. Medical Ctr. (United States) and Duke Univ. (United States)
- 7550 1P **Bevacizumab (Avastin) conjugated microbubbles for anti-VEGF treatment of neovascular age-related macular degeneration** [7550-61]
L. Zhang, J. Xu, J. Huang, C. Roberts, R. Xu, The Ohio State Univ. (United States)
- 7550 1Q **In vivo, dual-modality imaging of mouse eyes: optical coherence tomography and photoacoustic microscopy within a single instrument** [7550-62]
B. Rao, L. Li, K. Maslov, L. V. Wang, Washington Univ. at St. Louis (United States)
- 7550 1R **Analysis of dynamic light scattering data with sparse Bayesian learning for the study of cataractogenesis** [7550-63]
S.-L. Nyee, National Cheng Kung Univ. (Taiwan); R. R. Ansari, NASA Glenn Research Ctr. (United States)
- 7550 1U **Spectral characterization of an ophthalmic fundus camera** [7550-66]
C. T. Miller, Lickenbrock Technologies, LLC (United States); C. J. Bassi, Univ. of Missouri, St. Louis (United States); D. Brodsky, Fundus Photo, LLC (United States); T. Holmes, Lickenbrock Technologies, LLC (United States)
- 7550 1V **Image processing algorithms for ocular fundus reflectometry** [7550-67]
N. Palanisamy, I. Bruschi, M. Bonaiuti, L. Rovati, Univ. degli Studi di Modena e Reggio Emilia (Italy); C. E. Riva, Univ. degli Studi di Bologna (Italy)

- 7550 1W **Use of a cyanine dye probe to estimate the composition of the vitreous body after enzymatic treatment** [7550-68]
I. G. Panova, Institute of Developmental Biology (Russian Federation); A. S. Tatikolov, Institute of Biochemical Physics (Russian Federation); N. P. Sharova, Institute of Developmental Biology (Russian Federation)
- 7550 1X **Oxygen saturation imaging of human retinal vessels and measurement in eye disease patient for clinical application** [7550-69]
D. Nakamura, N. Matsuoka, K. Tatsuguchi, M. Ogata, Y. Yoshinaga, Kyushu Univ. (Japan); H. Enaida, Kyushu Medical Ctr. (Japan); T. Okada, T. Ishibashi, Kyushu Univ. (Japan)
- 7550 1Y **Blood flow measurement and slow flow detection in retinal vessels with joint spectral and time domain method in ultrahigh-speed OCT** [7550-70]
I. Gorczynska, M. Szkulmowski, I. Grulkowski, A. Szkulmowska, D. Szlag, Nicolaus Copernicus Univ. (Poland); J. G. Fujimoto, Massachusetts Institute of Technology (United States); A. Kowalczyk, M. Wojtkowski, Nicolaus Copernicus Univ. (Poland)
- 7550 20 **Near-infrared receiver for advanced ophthalmology** [7550-72]
R. A. Myers, R. Farrell, Radiation Monitoring Devices, Inc. (United States); Y. Zhang, Univ. of Alabama at Birmingham (United States); A. Roorda, Univ. of California, Berkeley (United States)
- 7550 21 **Retinal oximetry with a multiaperture camera** [7550-73]
P. Lemaillet, The Catholic Univ. of America (United States); A. Lompad, Polaris Sensor Technologies, Inc. (United States); M. Ibrahim, Q. D. Nguyen, Wilmer Eye Institute, The Johns Hopkins Univ. (United States); J. C. Ramella-Roman, The Catholic Univ. of America (United States)
- 7550 22 **Quantitative analysis of thermally induced alterations of corneal stroma by second-harmonic generation imaging** [7550-74]
P. Matteini, F. Rossi, F. Ratto, Istituto di Fisica Applicata Nello Carrara, CNR (Italy); R. Cicchi, D. Kapsokalyvas, F. S. Pavone, Univ. degli Studi di Firenze (Italy); R. Pini, Istituto di Fisica Applicata Nello Carrara, CNR (Italy)
- 7550 23 **Availability of fluorescence spectroscopic in the accompaniment of formation of corneal cross-linking** [7550-76]
M. M. Costa, Lab. de Instrumentação Oftálmica, EESC, Univ. de São Paulo (Brazil) and Lab. de Biofotônica, IFSC, Univ. de São Paulo (Brazil); C. Kurachi, V. S. Bagnato, Lab. de Biofotônica, IFSC, Univ. de São Paulo (Brazil); S. J. Faria e Sousa, FMRP, Univ. de São Paulo (Brazil); L. Ventura, Lab. de Instrumentação Oftálmica, EESC, Univ. de São Paulo (Brazil)
- 7550 24 **Long term observation of low-power diode laser welding after penetrating keratoplasty in human patients** [7550-77]
F. Rossi, P. Matteini, R. Pini, Istituto di Fisica Applicata Nello Carrara, CNR (Italy); L. Menabuoni, I. Lenzetti, Unita Operativa Oculistica (Italy)
- 7550 25 **Ultraviolet analysis on in vitro corneas following tissue removal** [7550-78]
V. A. C. Lincoln, L. Ventura, Lab. de Instrumentação Oftálmica, EESC, Univ. de São Paulo (Brazil); S. J. Faria e Sousa, FMRP, Univ. de São Paulo (Brazil)

- 7550 27 **Simultaneous correction of large low-order and high-order aberrations with a new deformable mirror technology** [7550-80]
F. Rooms, S. Camet, J. F. Curis, ALPAO (France)
- 7550 28 **Measurement of the tear film and anterior chamber by confocal microscopy** [7550-81]
K. K. Buttenschön, J. M. Girkin, Durham Univ. (United Kingdom); C. G. Wilson, Univ. of Strathclyde (United Kingdom); D. J. Daly, Lein Applied Diagnostics Ltd. (United Kingdom)
- 7550 2A **Non-toric extended depth of focus contact lenses for astigmatism and presbyopia correction** [7550-83]
S. Ben Yaish, A. Zlotnik, O. Yehezkel, K. Lahav-Yacouel, Xceed Imaging Ltd. (Israel); M. Belkin, Goldshleger Eye Research Institute, Tel Aviv Univ. (United States); Z. Zalevsky, Bar-Ilan Univ. (Israel)
- 7550 2B **Software for keratometry measurements using portable devices** [7550-84]
C. M. Iyomasa, L. Ventura, J. J. De Groote, Univ. de São Paulo (Brazil)
- 7550 2D **Surface geometry and optical aberrations of ex-vivo crystalline lenses** [7550-87]
J. M. Bueno, C. Schwarz, Univ. de Murcia (Spain); E. Acosta, Univ. de Santiago de Compostela (Spain); P. Artal, Univ. de Murcia (Spain)
- 7550 2F **Toward building an anatomically correct solid eye model with volumetric representation of retinal morphology** [7550-89]
R. J. Zawadzki, Vision Science and Advanced Retinal Imaging Lab., Univ. of California, Davis (United States); T. S. Rowe, Rowe Technical Design, Inc. (United States); A. R. Fuller, B. Hamann, Univ. of California, Davis (United States); J. S. Werner, Vision Science and Advanced Retinal Imaging Lab., Univ. of California, Davis (United States)
- 7550 2G **An attempt to understand flicker vertigo: changes in pupil size and choroidal blood flow under flickering conditions** [7550-111]
M. G. Masi, L. Peretto, Univ. degli Studi di Bologna (Italy); L. Rovati, INFN, Univ. degli studi di Modena e Reggio Emilia (Italy); R. R. Ansari, NASA Glenn Research Ctr. (United States)
- 7550 2H **In vivo retinal imaging using liquid crystal adaptive optics with different color illumination** [7550-98]
K. Takeno, T. Shirai, National Institute of Advanced Industrial Science and Technology (Japan)

Author Index

Conference Committee

Symposium Chairs

James G. Fujimoto, Massachusetts Institute of Technology
(United States)

R. Rox Anderson, Wellman Center for Photomedicine, Massachusetts
General Hospital (United States) and Harvard School of Medicine
(United States)

Program Track Chair

Reza S. Malek, Mayo Clinic (United States)

Conference Chairs

Fabrice Manns, University of Miami (United States)

Per G. Söderberg, Uppsala Universitet (Sweden)

Arthur Ho, Institute for Eye Research Ltd. (Australia)

Program Committee

Rafat R. Ansari, NASA Glenn Research Center (United States)

Michael Belkin, Tel Aviv University (Israel)

Ralf Brinkmann, Universität zu Lübeck (Germany)

Wolfgang Drexler, Cardiff University (United Kingdom)

Daniel X. Hammer, Physical Sciences Inc. (United States)

Karen M. Joos, Vanderbilt University (United States)

Katsuhiko Kobayashi, Topcon Corporation (Japan)

Kirill V. Larin, University of Houston (United States)

Ezra I. Maguen, American Eye Institute (United States)

Donald T. Miller, Indiana University (United States)

Peter J. Milne, National Science Foundation (United States)

Daniel V. Palanker, Stanford University Medical Center (United States)

Jean-Marie A. Parel, University of Miami Medical School (United States)

Roberto Pini, Istituto di Fisica Applicata Nello Carrara, CNR (Italy)

Luigi L. Rovati, Università degli Studi di Modena e Reggio Emilia (Italy)

Georg Schuele, OptiMedica Corporation (United States)

Jerry Sebag, University of Southern California (United States)

Peter Soliz, VisionQuest Biomedical, LLC (United States)

William B. Telfair, IRIDEX Corporation (United States)

Valery V. Tuchin, Saratov State University (Russian Federation)

Session Chairs

Ophthalmic Treatment Monitoring and Assessment

Georg Schuele, OptiMedica Corporation (United States)

William B. Telfair, IRIDEX Corporation (United States)

Presbyopia and Cataract

Jean-Marie A. Parel, University of Miami (United States)

Arthur Ho, Institute for Eye Research Ltd. (Australia)

Keynote Session

Per G. Söderberg, Uppsala Universitet (Sweden)

Ophthalmic Imaging and Diagnostics: Functional

Kirill V. Larin, University of Houston (United States)

Rafat R. Ansari, NASA Glenn Research Center (United States)

Ocular Biometry

Per G. Söderberg, Uppsala Universitet (Sweden)

Pablo Artal, Universidad de Murcia (Spain)

Ophthalmic Imaging: Polarization

Wolfgang Drexler, Cardiff University (United Kingdom)

Donald T. Miller, Indiana University (United States)

Ophthalmic Laser-Tissue Interactions

Ralf Brinkmann, Universität zu Lübeck (Germany)

Roberto Pini, Istituto di Fisica Applicata Nello Carrara, CNR (Italy)

Ophthalmic Adaptive Optics I: Retinal Imaging

Daniel V. Palanker, Stanford University School of Medicine (United States)

Luigi L. Rovati, Università degli Studi di Modena e Reggio Emilia (Italy)

Ophthalmic Adaptive Optics II: Vision Correction

Peter Soliz, VisionQuest Biomedical, LLC (United States)

Michael Belkin, Tel Aviv University (Israel)

Ophthalmic Imaging: Animal Models

Karen M. Joos, Vanderbilt University (United States)

Daniel X. Hammer, Physical Sciences Inc. (United States)

Ophthalmic Imaging: Cellular, Resolution, Speed, Penetration I

Kirill V. Larin, University of Houston (United States)

Roberto Pini, Istituto di Fisica Applicata Nello Carrara, CNR (Italy)

Ophthalmic Imaging: Cellular, Resolution, Speed, Penetration II
Donald T. Miller, Indiana University (United States)
Wolfgang Drexler, Cardiff University (United Kingdom)

Introduction

The papers in this volume were presented at the 20th conference on Ophthalmic Technologies, held on 23–25 January 2010, at the Moscone Center in San Francisco, California as a part of the SPIE Photonics West BIOS Meeting. In 2010, we celebrated not only the 50th anniversary of the laser, but also the 20th installment of the Ophthalmic Technologies conference. Ophthalmic Technologies I, chaired by Prof. Jean-Marie Parel, was held in Los Angeles in 1991. After 4 years in Los Angeles followed by 15 years in San Jose, our meeting was held for the first time in San Francisco.

In total, 56 talks and 32 posters (a record number) were presented by scientists, clinicians, and engineers from academia, private clinics, and industry representing 19 different countries spread over 4 continents. The topics covered included advances in adaptive optics for retinal imaging and vision assessment, new applications of femtosecond lasers, and the use of advanced microscopy techniques for corneal and retinal imaging. The crowded poster session held on Monday evening was one of the highlights of the meeting, with lively discussions about the 31 posters.

The tenth Pascal Rol Award was presented to Dr. Daniel X. Hammer and his colleagues from Physical Sciences Inc., Andover, MA for their excellent paper on "*Multimodal adaptive optics for depth-enhanced high-resolution ophthalmic imaging*" (#7550-35). Established in memory of Dr. Pascal O. Rol, former chair and co-founder of the Ophthalmic Technologies conference, the award is in recognition of the best manuscript and presentation. We are extremely grateful to Drs. Wolfgang Drexler, Arthur Ho, Ezra Maguen, Daniel Palanker, and Jean-Marie Parel who reviewed the abstracts and manuscripts submitted to the conference, and had the difficult task of selecting the winner among five excellent finalists. The other finalists were Drs. Makita (#7550-14), Ferguson (#7550-34), Alt (#7550-45), and Pircher (#7550-54).

The conference hosted its fifth presentation on the topic of unmet technological needs in a clinical area. Prof. Okihiro Nishi, from the Nishi Eye Hospital in Osaka, Japan, gave an overview and personal perspective on "*Technology needs for the development of the accommodative intraocular lens*" (#7550-100).

We are very grateful to Topcon Advanced Biomedical Imaging Laboratory and The Swedish Ophthalmological Society, Resident Optics Course for sponsoring the 2010 award and keynote lecture through the Pascal Rol Foundation.

The Chairs would also like to thank all the Program Committee members, session chairs, speakers, and participants, as well as the SPIE staff, for their dedication in making this conference a success.

We extend an invitation for the Ophthalmic Technologies XXI conference, which is scheduled for 22–25 January 2011 in San Francisco, California.

Tenth Pascal Rol Award for Excellence in Ophthalmic Technologies

Supported through the Pascal Rol Foundation by

**Topcon Advanced Biomedical Imaging Laboratory
The Swedish Ophthalmological Society, Resident Optics Course**

Presented on 24 January 2010 to

Daniel X. Hammer et al.

for their excellent paper on

***"Multimodal adaptive optics for depth-enhanced
high-resolution ophthalmic imaging"***

Award Committee members and Conference Chairs present the 2010
Pascal Rol Award to Dr. Hammer.

From left to right: Wolfgang Drexler, Jean-Marie Parel, Daniel X. Hammer, Per G. Söderberg,
Fabrice Manns, Daniel Palanker, Arthur Ho

Past Recipients of Pascal Rol Award for Excellence in Ophthalmic Technologies:

2009	Kazuhiro Kurokawa	<i>1μm wavelength adaptive optics scanning laser ophthalmoscope</i>
2008	Boris Povazay	<i>Minimum distance mapping using volumetric OCT: A novel indicator for early glaucoma diagnosis</i>
2007	Yoshiaki Yasuno	<i>Clinical examinations of anterior eye segments by three-dimensional swept-source optical coherence tomography</i>
2006	Enrique Fernandez	<i>Adaptive optics using a liquid crystal spatial light modulator for ultrahigh-resolution optical coherence tomography</i>
2005	Karsten König	<i>Cornea surgery with nanojoule femtosecond laser pulses</i>
2004	Daniel Palanker	<i>Attracting retinal cells to electrodes for high-resolution stimulation</i>
2003	Igor Ermakov	<i>Non-invasive optical techniques for the measurement of macular pigments</i>
2002	Georg Schuele	<i>Non-invasive temperature measurements during laser irradiation of the retina with optoacoustic techniques</i>
2001	Matthew Smith	<i>Minimizing the influence of fundus pigmentation on retinal vessel oximetry measurements</i>

The 2010 Pascal Rol Lecture on Ophthalmic Technologies

Saturday January 23, 2010

Professor Okihiro Nishi, MD
Nishi Eye Hospital, Osaka, Japan

Technology needs for the development of the accommodative intraocular lens

SUMMARY

Refilling the lens capsule while preserving capsular integrity offers the potential to restore ocular accommodation. There are two persisting problems in capsular bag refilling for possible clinical application: Leakage of the injectable material through the capsular opening and capsular opacification. Numerous attempts for solving these cardinal problems have not been proven to be clinically applicable. Recently, we developed a novel capsular bag refilling procedure using a novel accommodative intraocular lens that serves as an optic as well as a plug for sealing the capsular opening. The procedure and the results of monkey experiments were presented.

"The Pascal Rol Lecture on Ophthalmic Technologies" is presented by a leading clinical ophthalmologist with a strong interest and pioneering research contributions to the field of ophthalmic technologies. This invited lecture is intended to trigger further development of ophthalmic technologies by stimulating discussions between basic scientists, engineers, and clinicians.

The 2010 lecture was supported by Topcon Advanced Biomedical Imaging Laboratory and the Swedish Ophthalmological Society, Resident Optics Course (www.pascalrolfoundation.org)
