Volume 7811

Proceedings of SPIE, 0277-786X, v. 7811

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Atmospheric and Environmental Remote Sensing Data Processing and Utilization VI: Readiness for GEOSS IV*, edited by Mitchell D. Goldberg, Hal J. Bloom, Proceedings of SPIE Vol. 7811 (SPIE, Bellingham, WA, 2010) Article CID Number.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

v *Conference Committee*

SESSION 1 SATELLITE DATA ASSIMILATION AND FORECASTING

- 7811 02 **Impact of satellite surface wind observations on ocean surface wind analyses and numerical weather prediction (Invited Paper)** [7811-01]
R. Atlas, National Oceanic and Atmospheric Administration (United States); R. N. Hoffman, S. M. Leidner, Atmospheric and Environmental Research (United States); J. Ardizzone, SAIC/NASA Goddard Space Flight Ctr. (United States)
- 7811 03 **Improvement of the use of MSG and GOES data in the NCEP GDAS** [7811-03]
T. Zhu, CIRA/Colorado State Univ. (United States) and NOAA/NESDIS/STAR (United States); F. Weng, NOAA/NESDIS/STAR (United States); H. Liu, Science Applications International Corp. (United States); J. Derber, NOAA/NCEP/EMC (United States)

SESSION 2 SATELLITE CALIBRATION/VALIDATION

- 7811 05 **Report on the NIST workshop of December 10, 2009: calibration strategies for bridging possible climate data gaps** [7811-05]
R. U. Datla, J. Rice, C. Cooksey, National Institute of Standards and Technology (United States); K. J. Thome, NASA Goddard Space Flight Ctr. (United States); R. A. Barnes, Science Applications International Corp. (United States); C. Cao, National Oceanic and Atmospheric Administration (United States)
- 7811 06 **A comparison of the Antarctic Dome C and Sonoran Desert sites for the cal/val of visible and near infrared radiometers** [7811-06]
S. Uprety, Perot Systems Government Services (United States); C. Cao, NOAA/NESDIS/STAR (United States)
- 7811 07 **Extended inter-comparison of collocated MetOp-A AVHRR-IASI brightness temperature data and its implication for AVHRR calibration** [7811-07]
M. K. Rama Varma Raja, I. M. Systems Group, Inc., NOAA/NESDIS/STAR (United States); X. Wu, NOAA/NESDIS/STAR (United States); F. Yu, ERT Systems, Inc., NOAA/NESDIS/STAR (United States)
- 7811 08 **Validation of the MODIS albedo product and improving the snow albedo retrieval with additional AMSR-E data in Qinghai-Tibet Plateau** [7811-08]
H. Xue, State Key Lab. of Remote Sensing Science (China), Henan Polytechnic Univ. (China), and Beijing Normal Univ. (China); J. Wang, H. Jin, J. Bi, State Key Lab. of Remote Sensing Science (China) and Beijing Normal Univ. (China)

SESSION 3   DATA UTILIZATION I

- 7811 0B   **Spectral absorption properties of colored dissolved organic matter (CDOM) and total suspended matter (TSM) of inland waters** [7811-11]
K. Song, Northeast Institute of Geography and Agricultural Ecology (China) and Indiana Univ.-Purdue Univ. Indianapolis (United States); D. Liu, Northeast Institute of Geography and Agricultural Ecology (China); L. Li, Indiana Univ.-Purdue Univ. Indianapolis (United States); Z. Wang, Y. Wang, G. Jiang, Northeast Institute of Geography and Agricultural Ecology (China)

POSTER SESSION

- 7811 0F   **Definition and analysis of the circulation indices of polar vortex at 10 hPa in the Northern Hemisphere** [7811-12]
L. Li, S. Guan, P. Wang, J. Ma, B. Zhu, Nanjing Univ. of Information Science & Technology (China)
- 7811 0G   **Using TM thermal image to retrieve land surface temperature** [7811-16]
J. Guo, Institute of Plateau Meteorology (China) and Nanjing Univ. of Information Science & Technology (China); X. Li, B. Zhu, Y. Zhou, Nanjing Univ. of Information Science & Technology (China)

Author Index

Conference Committee

Program Track Chair

Allen H.-L. Huang, University of Wisconsin, Madison (United States)

Conference Chairs

Mitchell D. Goldberg, National Oceanic and Atmospheric Administration (United States)

Hal J. Bloom, Earth Resources Technology, Inc. (United States)

Conference Cochairs

Philip E. Ardanuy, Raytheon Intelligence & Information Systems (United States)

Allen H.-L. Huang, University of Wisconsin, Madison (United States)

Program Committee

John J. Bates, NOAA/NESDIS National Climatic Data Center (United States)

James J. Butler, NASA Goddard Space Flight Center (United States)

Changyong Cao, National Oceanic and Atmospheric Administration (United States)

Wei Gao, Colorado State University (United States)

Steve Goodman, National Oceanic and Atmospheric Administration (United States)

John F. Le Marshall, Bureau of Meteorology (Australia)

Johannes Schmetz, European Organisation for the Exploitation of Meteorological Satellites (Germany)

William L. Smith, Jr., NASA Langley Research Center (United States)

Session Chairs

- 1 Satellite Data Assimilation and Forecasting
Hal J. Bloom, Earth Resources Technology, Inc. (United States)
- 2 Satellite Calibration/Validation
Mitchell D. Goldberg, National Oceanic and Atmospheric Administration (United States)
- 3 Data Utilization I
Allen H.-L. Huang, University of Wisconsin, Madison (United States)
- 4 Data Utilization II
Allen H.-L. Huang, University of Wisconsin, Madison (United States)
