SPIE

Volume 8018

Proceedings of SPIE, 0277-786X, v. 8018

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/11/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

xi	Conference Committee
xiii	Introduction

SESSION 1 BIOLOGICAL AEROSOL BACKGROUND CHARACTERIZATION

8018 02	Biological aerosol background characterization [8018-01] J. M. Blatny, FFI Fotsvarets (Norway); A. W. Fountain III, U.S. Army Edgewood Chemical Biological Ctr. (United States)
8018 03	Characterization of laser induced fluorescence from background aerosols in a maritime environment [8018-02] S. Buteau, J.-R. Simard, D. Nadeau, Defence Research and Development Canada (Canada)
8018 04	Fluorescence spectra of bioaerosols exposed to ozone in a laboratory reaction chamber to simulate atmospheric processing [8018-03] Y.-L. Pan, S. C. Hill, R. G. Pinnick, U.S. Army Research Lab. (United States); J. L. Santarpia, N. Baker, B. Alvarez, S. Ratnesar-Shumate, B. Cottrell, L. McKee, The Johns Hopkins Univ. Applied Physics Lab. (United States)
8018 05	Ground truth methods for optical cross-section modeling of biological aerosols [8018-04] J. Kalter, E. Thrush, J. Santarpia, Z. Chaudhry, J. Gilberry, D. M. Brown, A. Brown, C. C. Carter, The Johns Hopkins Univ. (United States)
8018 06	Optimal classification of standoff bioaerosol measurements using evolutionary algorithms [8018-05] R. Nyhavn, H. J. F. Moen, Ø. Farsund, G. Rustad, Norwegian Defence Research Establishment (Norway)
8018 07	On the information content of linear and circular depolarization signatures of bioaerosols [8018-06] G. Roy, Defence Research and Development Canada (Canada); X. Cao, Royal Military College of Canada (Canada); R. Bernier, Les Instruments Optiques du St-Laurent Inc. (Canada)

SESSION 2 BIOLOGICAL DETECTION

8018 08	Tracking <i>Legionella</i> in air generated from a biological treatment plant: a case study of the outbreak of legionellosis in Norway [8018-07] J. M. Blatny, J. S. Olsen, Ø. Andreassen, Norwegian Defence Research Establishment (Norway); V. Waagen, Borregaard (Norway); B. A. P. Reif, Norwegian Defence Research Establishment (Norway)
---------	--

- 8018 09 **Characterizing phylogenetic diversity in airborne bacterial populations in China** [8018-08]
Z. Chaudhry, J. L. Santarpia, The Johns Hopkins Univ. Applied Physics Lab. (United States);
J. V. Martins, Univ. of Maryland-Baltimore County (United States)
- 8018 0A **Dynamic staining of bacteria at a single-cell level** [8018-09]
V. Nuñez, S. Upadhyayula, A. Lin, K. Chau, V. I. Vullev, Univ. of California, Riverside (United States)
- 8018 0B **Selective vapor phase sensing of small molecules using biofunctionalized field effect transistors** [8018-10]
J. A. Hagen, S. N. Kim, N. Kelley-Loughnane, R. R. Naik, M. O. Stone, Air Force Research Lab. (United States)
- 8018 0C **A distributed national network for label-free rapid identification of emerging pathogens** [8018-11]
J. P. Robinson, B. P. Rajwa, Purdue Univ. (United States); M. M. Dundar, Indiana Univ.-Purdue Univ. Indianapolis (United States); E. Bae, V. Patsekin, Purdue Univ. (United States);
E. D. Hirlman, Univ. of California, Merced (United States); A. M. Roumani, Purdue Univ. (United States); A. K. Bhunia, J. E. Dietz, V. J. Davisson, Purdue Univ. (United States);
J. G. Thomas, West Virginia Univ. (United States)

SESSION 3 RADIOLOGICAL AND NUCLEAR DETECTION

- 8018 0D **Gamma/neutron analysis for SNM signatures at high-data rates (greater than 10^7 cps) for single-pulse active interrogation** [8018-12]
I. Dioszegi, C. Salwen, Brookhaven National Lab. (United States); L. Forman, Ion Focus Technology Inc. (United States)
- 8018 0F **Detection of thermal neutrons using gadolinium-oxide-based nanocrystals** [8018-14]
A. C. Rivera, N. N. Glazener, N. C. Cook, B. A. Akins, J. B. Plumley, N. J. Withers, K. Carpenter, G. A. Smolyakov, R. D. Busch, M. Osiński, The Univ. of New Mexico (United States)
- 8018 0G **An air fluorescence imaging system for the detection of radiological contamination** [8018-15]
E. Inrig, L. Erhardt, Defence Research and Development Canada (Canada); V. Koslowsky, B. Andrews, H. Ing, M. Dick, P. Forget, Bubble Technology Industries, Inc. (Canada)
- 8018 0H **Tl-based wide gap semiconductor materials for x-ray and gamma ray detection** [8018-16]
Z. Liu, J. A. Peters, C. Zang, N. K. Cho, B. W. Wessels, S. Johnsen, S. Peter, J. Androulakis, M. G. Kanatzidis, J.-H. Song, H. Jin, A. J. Freeman, Northwestern Univ. (United States)
- 8018 0J **Compton imaging with a planar semiconductor system using pulse shape analysis** [8018-18]
A. Sweeney, A. J. Boston, H. C. Boston, J. P. Cresswell, J. Dormand, Univ. of Liverpool (United Kingdom); M. Ellis, Atomic Weapons Establishment (United Kingdom); L. J. Harkness, M. Jones, D. S. Judson, P. J. Nolan, D. C. Oxley, D. P. Scraggs, M. J. Slee, Univ. of Liverpool (United Kingdom); A. Thandi, Atomic Weapons Establishment (United Kingdom)

SESSION 4 FUNDAMENTALS CONCEPTS IN CHEMICAL SENSING

- 8018 OK **Visible/near-infrared hyperspectral sensing of solids under controlled environmental conditions** [8018-20]
B. E. Bernacki, N. C. Anheier, A. Mendoza, B. G. Fritz, T. J. Johnson, Pacific Northwest National Lab. (United States)
- 8018 OM **Optical constants of neat liquid-chemical warfare agents and related materials measured by infrared spectroscopic ellipsometry** [8018-22]
C. S.-C. Yang, Battelle East Science and Technology Ctr. (United States); B. R. Williams, M. S. Hulet, SAIC (United States); T. E. Tiwald, J.A. Woollam, Inc. (United States); R. W. Miles, Jr., A. C. Samuels, U.S. Army Edgewood Chemical Biological Ctr. (United States)
- 8018 ON **Active infrared multispectral imaging of chemicals on surfaces** [8018-23]
A. K. Goyal, M. Spencer, M. Kelly, J. Costa, M. DiLiberto, E. Meyer, T. Jeys, MIT Lincoln Lab. (United States)
- 8018 OO **Polarimetry and infrared spectroscopy in the detection of low-volatility chemical threats** [8018-24]
M. W. Petryk, A. J. Marengo, Defence Research and Development Canada (Canada)
- 8018 OP **Characterization of next-generation commercial surface-enhanced Raman scattering (SERS) substrates** [8018-25]
M. E. Hankus, D. N. Stratis-Cullum, P. M. Pellegrino, U.S. Army Research Lab. (United States)

SESSION 5 LASER-BASED CHEMICAL DETECTION

- 8018 OQ **A two-pulse, pump probe method for short-range, remote standoff detection of chemical warfare agents** [8018-26]
S. E. Bisson, J. M. Headrick, T. A. Reichardt, R. L. Farrow, T. J. Kulp, Sandia National Labs. (United States)
- 8018 OR **Standoff chemical detection using quantum cascade lasers and photoacoustic sensing** [8018-27]
X. Chen, Univ. of Maryland, Baltimore County (United States); D. Janssen, Greater Grace Christian Academy (United States); F. V. Choa, Univ. of Maryland, Baltimore County (United States)
- 8018 OS **LIBS spectroscopic classification relative to compressive sensing** [8018-28]
S. T. Griffin, E. Jacobs, O. Fuxhi, The Univ. of Memphis (United States)
- 8018 OT **Standoff detection applying laser-induced breakdown spectroscopy at the DLR laser test range** [8018-29]
J. Handke, F. Duschek, K. Gruenewald, C. Pargmann, Deutsches Zentrum für Luft- und Raumfahrt e.V. (Germany)

SESSION 6 NOVEL DEVICES FOR CHEMICAL DETECTION

- 8018 0U **Mid-infrared optical fiber Fourier transform infrared spectrometer** [8018-30]
K. J. Ewing, L. B. Shaw, R. Kim, R. R. Gattass, J. Sanghera, U.S. Naval Research Lab. (United States); I. Aggarwal, Sotera Defense Solutions, Inc. (United States)
- 8018 0V **Hollow core fiber optics for mid-wave and long-wave infrared spectroscopy** [8018-31]
J. M. Kriesel, N. Gat, Opto Knowledge Systems, Inc. (United States); B. E. Bernacki, R. L. Erikson, B. D. Cannon, T. L. Myers, Pacific Northwest National Lab. (United States); C. M. Bledt, J. A. Harrington, Rutgers, The State Univ. of New Jersey (United States)
- 8018 0W **Photothermal nano-cavities for ultra-sensitive chem-bio detection** [8018-32]
J. Hu, Univ. of Delaware (United States); J. D. Musgrave, N. Carlie, Clemson Univ. (United States); A. Agarwal, Massachusetts Institute of Technology (United States); K. Richardson, Clemson Univ. (United States); L. C. Kimerling, Massachusetts Institute of Technology (United States)
- 8018 0X **Demonstration of microcantilever-based sensor array with integrated microfluidics** [8018-33]
G. P. Nordin, R. R. Anderson, S. J. Ness, W. Hu, T. M. Gustafson, J. W. Noh, D. C. Richards, S. Kim, Brigham Young Univ. (United States)

SESSION 7 STANDOFF CHEMICAL DETECTION MODELING AND ALGORITHMS

- 8018 0Y **Coordinated sensor cueing for chemical plume detection** [8018-34]
N. J. Abraham, A. M. Jensenius, A. S. Watkins, R. C. Hawthorne, B. J. Stepnitz, The Johns Hopkins Univ. Applied Physics Lab. (United States)
- 8018 0Z **Enhanced chemical weapon warning via sensor data fusion** [8018-35]
M. Flaherty, D. Pritchett, B. Cothren, J. Schwaiger, Torch Technologies Inc. (United States)
- 8018 10 **Sensor fusion for chemical plume detection, classification, and tracking** [8018-36]
A. S. Watkins, J. D. Barton, C. R. Hawthorne, The Johns Hopkins Univ. Applied Physics Lab. (United States)
- 8018 11 **Modeling of photoacoustic vapor sensors using a multiphysics approach** [8018-37]
E. L. Holthoff, P. M. Pellegrino, U.S. Army Research Lab. (United States); J. S. Crompton, K. C. Koppenhoefer, AltaSim Technologies, LLC (United States)

SESSION 8 APPLICATIONS OF STANDOFF CHEMICAL DETECTION

- 8018 12 **Dynamic sensor deployment for the monitoring of chemical releases in urban environments (DYCE)** [8018-38]
J. J. Lepley, D. R. Lloyd, SELEX Galileo Ltd. (United Kingdom); A. Robins, Univ. of Surrey (United Kingdom); A. Rudd, Univ. of Reading (United Kingdom); A. Wilks, Owlstone Nanotech (United Kingdom)
- 8018 13 **Remote quantification of smokestack effluent mass flow rates using imaging Fourier transform spectrometry** [8018-39]
J. L. Harley, K. C. Gross, Air Force Institute of Technology (United States)

- 8018 14 **iCATSI: a multi-pixel imaging differential standoff chemical detection sensor** [8018-40]
L. Moreau, F. Prel, ABB (Canada); H. Lavoie, F. Bouffard, J. Theriault, Defence Research and Development Canada (Canada); C. Vallieres, C. Roy, ABB (Canada); D. Dubé, Defence Research and Development Canada (Canada)
- 8018 16 **Characterization of aerosol-containing chemical simulant clouds using a sensitive, thermal infrared imaging spectrometer** [8018-42]
J. L. Hall, The Aerospace Corp. (United States); F. M. D'Amico, S. J. Kolodzey, Joint Project NBC Contamination Avoidance, Aberdeen Proving Ground (United States); J. Qian, M. L. Polak, K. Westerberg, C. S. Chang, The Aerospace Corp. (United States)

SESSION 9 LASER AND RAMAN-BASED EXPLOSIVES DETECTION

- 8018 17 **Signal processing for the detection of explosive residues on varying substrates using laser-induced breakdown spectroscopy** [8018-43]
K. D. Morton, Jr., P. A. Torriano, L. Collins, Duke Univ. (United States)
- 8018 18 **Fabrication and testing of a standoff trace explosives detection system** [8018-44]
R. Waterbury, J. Rose, D. Vunck, T. Blank, K. Pohl, A. Ford, T. McVay, E. Dottery, Alakai Defense Systems, Inc. (United States)
- 8018 19 **Multiple-excitation-wavelength resonance-Raman explosives detection** [8018-45]
B. Yellampelle, M. Sluch, West Virginia High Technology Consortium Foundation (United States); S. Asher, Univ. of Pittsburgh (United States); B. Lemoff, West Virginia High Technology Consortium Foundation (United States)
- 8018 1A **Remote detection of explosives using Raman spectroscopy** [8018-46]
J. Fulton, Naval Surface Warfare Ctr. (United States)
- 8018 1B **229 nm UV photochemical degradation of energetic molecules** [8018-47]
L. Wang, D. Tuschel, S. A. Asher, Univ. of Pittsburgh (United States)
- 8018 1C **Ultraviolet resonance Raman spectroscopy of nitroaromatic compounds for standoff detection applications** [8018-48]
E. D. Emmons, J. A. Guicheteau, S. D. Christesen, A. W. Fountain III, U.S. Army Edgewood Chemical Biological Ctr. (United States)
- 8018 1D **Optimal dynamic detection of explosives** [8018-49]
D. S. Moore, Los Alamos National Lab. (United States); H. Rabitz, Princeton Univ. (United States); S. D. McGrane, M. T. Greenfield, R. J. Scharff, R. E. Chalmers, Los Alamos National Lab. (United States); J. Roslund, Princeton Univ. (United States)
- 8018 1E **Chemical and explosives point detection through opaque containers using spatially offset Raman spectroscopy (SORS)** [8018-50]
P. W. Loeffen, G. Maskall, S. Bonthron, M. Bloomfield, C. Tombling, Cobalt Light Systems Ltd. (United Kingdom); P. Matousek, Cobalt Light Systems Ltd. (United Kingdom) and Rutherford Appleton Lab. (United Kingdom)

- 8018 1F **Investigating a drop-on-demand microdispenser for standardized sample preparation** [8018-51]
E. L. Holthoff, M. E. Hankus, P. M. Pellegrino, U.S. Army Research Lab. (United States)
- 8018 1G **A mass spectrometer based explosives trace detector** [8018-52]
A. Vilkov, K. Jorabchi, K. Hanold, J. A. Syage, Syagen Technology, Inc. (United States)
- 8018 1H **Multi-colorimetric sensor array for detection of explosives in gas and liquid phase** [8018-53]
N. Kostesha, T. S. Alstrøm, Technical Univ. of Denmark (Denmark); C. Johnsen, K. A. Nielsen, J. O. Jeppesen, Univ. of Southern Denmark (Denmark); J. Larsen, A. Boisen, M. H. Jakobsen, Technical Univ. of Denmark (Denmark)

SESSION 10 NIR, IR, AND PHOTOTHERMAL DETECTION OF EXPLOSIVES

- 8018 1I **NIR spectroscopy with multivariate calibration and lock-in amplification to detect chemicals concealed behind fabrics** [8018-54]
A. Saleem, C. Canal, D. A. Hutchins, R. J. Green, The Univ. of Warwick (United Kingdom)
- 8018 1L **The limit of detection for explosives in spectroscopic differential reflectometry** [8018-57]
T. Dubroca, K. Vishwanathan, R. E. Hummel, Univ. of Florida (United States)
- 8018 1M **Empirical model for the temporally resolved temperatures of post-detonation fireballs for aluminized high explosives** [8018-58]
J. M. Gordon, K. C. Gross, G. P. Perram, Air Force Institute of Technology (United States)
- 8018 1N **A novel infrared hyperspectral imager for passive standoff detection of explosives and explosive precursors** [8018-59]
J. N. Thériault, Defence Research and Development Canada (Canada); Y. Montembeault, Telops, Inc. (Canada); H. Lavoie, F. Bouffard, Defence Research and Development Canada (Canada); G. Fortin, P. Lacasse, AEREX Avionique Inc. (Canada); A. Vallières, Telops (Canada); E. Puckrin, Defence Research and Development Canada (Canada); V. Farley, Telops (Canada); D. Chamberland, Defence Research and Development Canada (Canada); T. Bubner, Defence Science and Technology Organisation (Australia)
- 8018 1O **Compact, wide field DRS explosive detector** [8018-60]
E. Schundler, D. Carlson, R. Vaillancourt, J. Rentz Dupuis, C. Schwarze, OPTRA, Inc. (United States)
- 8018 1P **Infrared laser-induced breakdown spectroscopy emissions from energetic materials** [8018-61]
C. C.-S. Yang, Battelle Eastern Science and Technology Ctr. (United States); E. Brown, U. Hommerich, Hampton Univ. (United States); S. B. Trivedi, Brimrose Corp. of America (United States); A. C. Samuels, A. P. Snyder, U.S. Army Edgewood Chemical Biological Ctr. (United States)

POSTER SESSION

- 8018 1R **The ChemSight: an open-path, multichemical detector for security applications** [8018-63]
S. K. Holland, James Madison Univ. (United States); G. Laufer, Univ. of Virginia (United States)

- 8018 1S **Threat representative droplet generation and surface interaction analysis** [8018-64]
S. Simpson, T. H. Chyba, R. M. Jones, G. Harper, D. Haslam, ITT Corp. (United States)
- 8018 1T **Investigation of standoff explosives detection via photothermal/photoacoustic interferometry** [8018-65]
P. S. Cho, Celight, Inc. (United States); R. M. Jones, T. Shuman, D. Scoglietti, ITT Corp. (United States); G. Harston, Celight, Inc. (United States)
- 8018 1U **Explosives detection in the marine environment using UUV-modified immunosensor** [8018-66]
P. T. Charles, U.S. Naval Research Lab. (United States); A. A. Adams, US National Academy of Sciences - NRC (United States); J. R. Deschamps, U.S. Naval Research Lab. (United States); S. P. Veitch, A. Hanson, SubChem Systems (United States); A. W. Kusterbeck, U.S. Naval Research Lab. (United States)
- 8018 1V **Detection of TATP precursor acetone at trace levels using rf sputtered SnO₂ thin film-based sensors** [8018-67]
A. Chowdhuri, A. Sharma, V. Gupta, Univ. of Delhi (India)
- 8018 1X **Gas image enhancement based on adaptive time-domain filtering and morphology** [8018-70]
C. Zhang, L. Wang, J. Li, Y. Long, B. Zhang, Beijing Institute of Technology (China)
- 8018 1Y **Smart radiation monitor for airport baggage screening** [8018-71]
A. Osovizky, D. Ginzburg, Rotem Industries Ltd. (Israel); E. Marcus, Y. Yehuda-Zada, M. Ghelman, E. Vax, Nuclear Research Ctr. Negev (Israel); V. Bronfenmacher, Rotem Industries Ltd. (Israel); T. Mazar, Y. Cohen, Nuclear Research Ctr. Negev (Israel)
- 8018 1Z **Rotationally resolved infrared spectra of the explosive bouquet compounds associated with C-4 explosives** [8018-73]
T. N. Clasp, T. Johnson, M. N. Sullivan, S. W. Reeve, Arkansas State Univ. (United States)

Introduction – Chemical, Biological, Radiological, Nuclear, and Explosives (CBRNE) Sensing XII

This year we held our twelfth annual conference for the Chemical, Biological, Radiological, Nuclear and Explosives (CBRNE) sensing at the SPIE Defense, Security and Sensing (DSS) Symposium and the last in Orlando, Florida, USA. The topics being presented at the conference clearly show the convergence of multiple detection modalities for sensing CBRNE threats to National Security. The SPIE DSS symposium remains an unprecedented international forum for authors from government, industry, and academia to gather and address a wide variety of sensing issues and technologies. In particular, the authors in these conference proceedings represent nearly an equal one-third partition among those groups, and are leaders in each of their respective fields.

This year we accepted the largest number of papers and posters ever to be presented at the CBRNE Sensing Conference. For Biological Sensing, we held a special topical session to address the continuing challenges of biological aerosol detection. We also saw continued growth in areas of research supporting proximity detection of chemical threats on surfaces. Explosives sensing remains one of our strongest areas in the conference, and there are a number of outstanding papers published here. The presentations within the radiological and nuclear threat detection topical section addressed a number of threats important to homeland security, and rounded out the entire conference.

We want to take this time to particularly thank the members of the program committee for helping us plan, organize, and orchestrate this year's conference. They each work behind scenes all year long to make this conference not only possible, but truly a first-rate affair. Whether they come from government laboratories, agencies, industry or academia, they bring a tremendous amount of energy and professionalism to help run this conference and make it successful.

We hope that each of you will find value in the proceedings from this year's conference, and we look forward to seeing everyone in 2012 at the thirteenth conference (XIII) – the first time to be held in Baltimore, Maryland, USA.

Augustus W. Fountain III
Patrick J. Gardner
