Volume 8056

Proceedings of SPIE, 0277-786X, v. 8056

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/11/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii	Conference Committee
ix	In Memoriam: Zia-ur Rahman

SESSION 1 IMAGE ENHANCEMENT, NOISE, ETC.

8056 02	Impulse noise detection and removal using multiple weighted median filters [8056-01] D. Charalampidis, N. R. Vayuvegula, The Univ. of New Orleans (United States)
8056 03	Mean squared error performance of speckle-imaging using the bispectrum in horizontal imaging applications [8056-02] J. P. Bos, M. C. Roggemann, Michigan Technological Univ. (United States)
8056 04	Modified bilateral filter for illumination equalization [8056-03] S. Brisebois, M. Gartley, Rochester Institute of Technology (United States)

SESSION 2 APPLICATIONS I

8056 06	A novel orientation code for face recognition [8056-05] Y. Zheng, Alcorn State Univ. (United States)
8056 07	Eye tracking and its application in human computer interfaces [8056-06] T. Carroll, Univ. of Central Florida (United States); A. Rogers, Louisiana Tech Univ. (United States); D. Charalampidis, H. Chen, The Univ. of New Orleans (United States)
8056 08	Door surveillance using edge map-based Harris corner detector and active contour orientation [8056-07] N. Bangalore, W. Hassan, B. Mitra, P. Birch, R. Young, C. Chatwin, Univ. of Sussex (United Kingdom)
8056 09	Submap joining smoothing and mapping for camera-based indoor localization and mapping [8056-08] J. Bjärkefur, A. Karlsson, C. Grönwall, J. Rydell, Swedish Defence Research Agency (Sweden)
8056 0A	Designing the optimal convolution kernel for modeling the motion blur [8056-09] J. Jelinek, Honeywell ACS Labs. (United States)

SESSION 3 SUPERRESOLUTION ALGORITHMS/SYSTEM DESIGN

8056 0B	Digital zoom algorithm with context derived basis functions [8056-10] H. C. Schau, Meridian Systems LLC (United States)
8056 0C	Super resolution of time-lapse seismic images [8056-11] S. E. Zarantonello, Algorithmica LLC (United States) and Santa Clara Univ. (United States); B. Smithson, Santa Clara Univ. (United States); Y. Quan, Stanford Univ. (United States)

- 8056 OD **On the restoration of the microscanned images captured from unmanned airborne vehicles** [8056-12]
A. H. Yousef, Z. Rahman, M. Karim, Old Dominion Univ. (United States)
- 8056 OE **Continuous quantification of uniqueness and stereoscopic vision** [8056-13]
V. Petran, Artificial Perception Technologies Inc. (United States); F. Merat, Case Western Reserve Univ. (United States)
- 8056 OG **Creating Bespoke COTS solutions for image processing applications** [8056-16]
R. Rickman, D. Hickman, M. Smith, S. Page, J. Sadler, Waterfall Solutions Ltd. (United Kingdom)

SESSION 4 IMAGE ANALYSIS

- 8056 OH **Automatic detection of aircraft emergency landing sites** [8056-18]
Y.-F. Shen, Old Dominion Univ. (United States); Z. Rahman, NASA Langley Research Ctr. (United States); D. Krusienski, J. Li, Old Dominion Univ. (United States)
- 8056 OI **Context-based semantic labeling of human-vehicle interactions in persistent surveillance systems** [8056-19]
V. Elangovan, A. Shirkhodaie, Tennessee State Univ. (United States)
- 8056 OJ **Image understanding algorithms for segmentation evaluation and region-of-interest identification using Bayesian networks** [8056-20]
M. Jaber, E. Saber, Rochester Institute of Technology (United States)
- 8056 OK **Fast motion prediction algorithm for multiview video coding** [8056-21]
A. Abdelazim, G. Y. Zhang, S. J. Mein, M. R. Varley, Univ. of Central Lancashire (United Kingdom); D. Ait-Boudaoud, Univ. of Portsmouth (United Kingdom)

SESSION 5 MODELING

- 8056 OL **Improved neural network modeling of inverse lens distortion** [8056-22]
J. P. de Villiers, Council for Scientific and Industrial Research (South Africa) and Univ. of Cape Town (South Africa); J. Cronje, Council for Scientific and Industrial Research (South Africa); F. Nicolls, Univ. of Cape Town (South Africa)
- 8056 OM **Novel adaptive kernels for image sharpening in the presence of noise** [8056-23]
D. C. Bamber, Waterfall Solutions Ltd (United Kingdom); P. K. Kimber, SELEX Galileo Ltd. (United Kingdom)
- 8056 ON **Information theoretic analysis of canny edge detection in visual communication** [8056-24]
B. Jiang, Z. Rahman, Old Dominion Univ. (United States)
- 8056 OO **Local color transfer based on dark-channel dehazing for visible/infrared image fusion** [8056-25]
B. Zhang, L. Wang, Beijing Institute of Technology (China)

SESSION 6 COMPUTATIONAL IMAGING

- 8056 0P **Space-time feature-specific imaging** [8056-26]
V. Treeaporn, A. Ashok, The Univ. of Arizona (United States); M. A. Neifeld, The Univ. of Arizona (United States) and College of Optical Sciences, The Univ. of Arizona (United States)
- 8056 0Q **Transform domain adaptive compressive sensing of specific objects (Invited Paper)** [8056-27]
A. Mahalanobis, Lockheed Martin Missiles and Fire Control (United States)
- 8056 0T **Image formation challenges in the MOSAIC platform (Invited Paper)** [8056-31]
M. E. Gehm, The Univ. of Arizona (United States) and College of Optical Sciences, The Univ. of Arizona (United States); D. R. Golish, E. M. Vera, The Univ. of Arizona (United States); J. Hahn, D. L. Marks, D. J. Brady, Duke Univ. (United States)

SESSION 7 APPLICATIONS II

- 8056 0U **On grey levels in random CAPTCHA generation** [8056-32]
F. Newton, M. A. Kouritzin, Univ. of Alberta (Canada)
- 8056 0V **A simplified rate control algorithm for H.264/SVC** [8056-33]
G. Y. Zhang, A. Abdelazim, S. J. Mein, M. R. Varley, Univ. of Central Lancashire (United Kingdom); D. Ait-Boudaoud, Univ. of Portsmouth (United Kingdom)

POSTER SESSION

- 8056 0Y **The new image segmentation algorithm using adaptive evolutionary programming and fuzzy c-means clustering** [8056-37]
F. Liu, Beijing Univ. of Technology (China)
- 8056 0Z **Review of metropolis Monte Carlo image enhancements** [8056-38]
A. M. Amini, Southern Univ. (United States)
- 8056 10 **A system for airport surveillance: detection of people running, abandoned objects, and pointing gestures** [8056-39]
S. Foucher, M. Lalonde, L. Gagnon, CRIM (Canada)

Author Index

Conference Committee

Symposium Chair

William Jeffrey, HRL Laboratories, LLC (United States)

Symposium Cochair

Kevin P. Meiners, Office of the Secretary of Defense (United States)

Conference Chairs

Zia-ur Rahman, NASA Langley Research Center (United States)

Stephen E. Reichenbach, University of Nebraska-Lincoln (United States)

Mark A. Neifeld, The University of Arizona (United States)

Program Committee

Gary W. Euliss, MITRE Corporation (United States)

Amit Ashok, The University of Arizona (United States)

Richard D. Juday, NASA Johnson Space Center (United States)

Ram M. Narayanan, The Pennsylvania State University (United States)

John M. Pellegrino, U.S. Army Research Laboratory (United States)

Robert A. Schowengardt, The University of Arizona (United States)

Joseph van der Gracht, HoloSpex, Inc. (United States)

Session Chairs

- 1 Image Enhancement, Noise, Etc.
Stephen E. Reichenbach, University of Nebraska-Lincoln (United States)
- 2 Applications I
Ram M. Narayanan, The Pennsylvania State University (United States)
- 3 Superresolution Algorithms/System Design
Mark A. Neifeld, The University of Arizona (United States)
- 4 Image Analysis
Stephen E. Reichenbach, University of Nebraska-Lincoln (United States)
- 5 Modeling
Amit Ashok, The University of Arizona (United States)

- 6 Computational Imaging
Amit Ashok, The University of Arizona (United States)
- 7 Applications II
Stephen E. Reichenbach, University of Nebraska-Lincoln (United States)

**In Memoriam:
Zia-ur Rahman, research engineer at NASA
Langley Research Center**

Dr. Zia-ur Rahman, age 48, passed away on December 16th, 2010 in a tragic car accident near Lexington, Virginia.

A Williamsburg resident, Rahman was originally from Pakistan. He was awarded a Bachelor's Degree from Ripon College, Wisconsin, and an M.S. and Ph.D. from the University of Virginia. Rahman was a research scientist with NASA Langley Research Center. He was previously an Associate Professor at Old Dominion University and at the College of William & Mary.

An SPIE member, Rahman was very active with the Society, serving as chair or co-chair of the Visual Information Processing conference held annually at the SPIE Defense, Security, and Sensing meeting. He also presented papers at other SPIE meetings, including SPIE/IS&T Electronic Imaging and SPIE Photonics West, and authored several SPIE journal papers.

Over his professional career, Rahman's interests included natural vision science, remote sensing, and information theoretic studies of electro-optical imaging systems and image processing. In recent years, his interest focused on generic non-linear image enhancement methods; he was a co-inventor of the Multi-Scale Retinex with Color Restoration and the Computational Visual Servo. The former led to three US and international patents. For these patents, Rahman received the NASA Space Act Award, one of the agency's highest awards. For his career contributions to NASA missions, he was honored with the NASA Public Service Medal, another of the agency's highest awards.

"As a close friend and research collaborator with Dr. Rahman, I can only say that I was the lucky beneficiary for many years of his deeply good personal character and his extraordinarily fertile and creative mind," said Dan Jobson, a NASA colleague.

Most recently, Rahman's interest shifted to generic visual pattern recognition. "His critical insights and unprecedented new ideas are a major contribution to advancing this technology and will provide a legacy for the future to those of us actively working in this technical area," continued Jobson. "He was both an outstanding researcher and teacher."

Dr. Rahman is survived by his wife Katherine, and his three sons Haroun, Kamran, and Noor.

Online condolences may be offered at www.nelsencares.com. View and post condolences on the online guestbook at dailypress.com/guestbooks.
